Organisms such as termites and carpenter ants can be controlled by drilling and injecting the powder into sound wood. Dust Application:

*Note:* Do not apply Nibor-D dust liberally to manure piles. Always follow the instructions on the label.

- For wood treatment during construction for prevention of wood-destroying organisms, apply Nibor-D solutions by brush or spray at the rate of 5 gallons of liquid solution per 1,000 ft² of treated area. Liquid solution is made by drilling and then injecting the liquid solution under pressure into sound wood or into the cavity of masonry or concrete.

- A 15% liquid solution is required.

- Wash and rinse all equipment after each use.

- Users should:
  - Use a face shield, safety glasses, dust mask, and rubber gloves while using Nibor-D. In case of contact with skin, wash skin with soap and water. If irritation occurs, consult a physician immediately.
  - Put on clean clothing; put on clean shoes; and put on clean rubber gloves if gloves were used before.
  - If Nibor-D comes in contact with foods or feedstuffs, discard the foods or feedstuffs.
  - The product container or label must be kept with the product at all times.
  - Do not contaminate food and feed stuffs.
  - Do not apply product directly onto wood that is to be left exposed to the elements.
  - Do not apply Nibor-D liquid solutions in conduits, pipes, or in electrical equipment bases, voids and wall voids; in openings around pipes and sinks and toilets; or in the bases of pounds, tanks, buckets, or other receptacles that might harbor beetles. Nibor-D is not intended for use in any area containing food or feed.
  - Do not apply Nibor-D liquid solutions on masonry or concrete surfaces. Refer to Section 5 for instructions on application of Nibor-D dust to masonry or concrete surfaces.

**Preparation of Treatment Solutions (In Situ Treatment):**

1. **Prepare a 15% liquid solution** as described above and also add a 1.5 lb (approximately 7.5 cups) of Nibor-D to every 1 gal of treatment solution needed. Use this solution as soon as possible and follow the instructions for application.

2. **Volume of water to the mixing vessel:** While stirring, gradually add 1.0 pound of Nibor-D to the mixing vessel. Allow Nibor-D to remain in the mixing vessel for a minimum of 30 minutes before use.

3. **Note:** Do not exceed the concentration of 15% liquid solution.

**Residual Knock-Down Emulsifiable Insect Adulticide:**

*For both interior and exterior use.*

**French Fly:**

- Use Nibor-D in apartment buildings, bird and poultry production facilities, buses, carpet cleaning equipment, battery rooms, cabinets, ceilings, closets, composting areas, machinery, metal packing, storage facilities, parking garages, printing presses, refrigerators, service rooms, smoke stacks, tennis courts, toilets, and zoos.

**Small Flies (including Fruit and Drain flies) and Lady Bugs:**

- Use Nibor-D in apartment buildings, bird and poultry production facilities, buses, carpet cleaning equipment, classroom areas, chemical storage areas, composting areas, machinery, metal packing, storage facilities, parking garages, printing presses, service rooms, smoke stacks, tennis courts, toilets, and zoos.

**Single Insect Treatments:**

- Use Nibor-D in apartment buildings, bird and poultry production facilities, buses, carpet cleaning equipment, classrooms, chemical storage areas, composting areas, machinery, metal packing, storage facilities, parking garages, printing presses, service rooms, smoke stacks, tennis courts, toilets, and zoos.

**Mop Solution:**

- For control of insects in sinks, toilets, bathtubs, and showers, make a solution of 5% Nibor-D in water. Use this solution as soon as possible after application.

**Contact Insecticide:**

- Use Nibor-D in apartment buildings, bird and poultry production facilities, buses, carpet cleaning equipment, classrooms, chemical storage areas, composting areas, machinery, metal packing, storage facilities, parking garages, printing presses, service rooms, smoke stacks, tennis courts, toilets, and zoos.

**Dust Application Instructions:**

- Use Nibor-D in existing construction, dust liberally using dusting equipment. Apply dust at 12-20 ounces per 250 ft². Dusting application equipment should be used to apply Nibor-D dust to structural wood in existing construction. Dust applications may be made at any time in building construction or repair and may be reapplied as necessary. For fly control, apply a fine dust liberally to areas that might harbor flies.
FOR THE CONTROL OF:
CRICKETS • COCKROACHES • SILVERFISH • ANTS
FLEAS • LADY BUGS • DRAIN FLIES • FRUIT FLIES
CLUSTER FLIES • DARKLING BEETLES • EARWIGS

For both interior and exterior use

ACTIVE INGREDIENT:
Disodium Octaborate Tetrahydrate (CAS No. 12280-03-4) 98%
OTHER INGREDIENT* ........................... 2%
TOTAL .............................................. 100%
*Contains 2% H2O - Absorbed Moisture

EPA Reg No. 64395-8
EPA Est No. 34460-RI-1

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals
CAUTION: Harmful if swallowed or inhaled. Causes moderate eye irritation. Avoid contact with eyes or clothing. Avoid breathing dust. Thoroughly wash with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage:
Store in a dry place. Do not store where children or animals may gain access.

Pesticide Disposal:
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Handling: Non-refillable container, do not reuse or refill this container. Completely empty container by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment, then offer for recycling, if available, or dispose of in a sanitary landfill; or, if allowed by state and local authorities, by incineration.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See outer packaging for First Aid, Precautionary Statements and complete Directions for Use.
