**WHY TO USE**

- Leaves no residue
- Reduces pH
- Kills bacteria and controls algae
- Not blended (no fillers)

**HOW TO CALCULATE POOL CAPACITY**

- Oval with straight sides: $\text{Full width} \times \text{full length} \times \text{average depth} \times 6.7$
- Rectangular: $\text{Average depth} \times \text{average length} \times \text{average width} \times 7.5$

**NET CONTENTS**

Other Ingredients: ....................................... precautionary statements and first aid.

See side panels for additional precautionary statements and first aid.

**DANGER**

- KEEP OUT OF REACH OF CHILDREN

**Active Ingredient:**

- Trichloro-s-triazinetrione: .............. 99%

**Total:** ....................................... 1%

**FOR START UP OF NEWLY FILLED POOLS:**

- Add stain and scale inhibitor to prevent staining of pool surface due to metals.
- When using other products as outlined in the directions for this product, always follow directions on those products.

**FOR SUPERCHLORINATION:**

- Before using this product, add a preventative algae treatment.

**FOR REENTRY:**

- Approximately 5 ppm (mg/L) of available chlorine.

**FOR CHLORINATION:**

- If the combined chlorine reading is not below 0.5 ppm (mg/L) and the combined chlorine level is above 0.5 ppm (mg/L), add 1.25 oz. product per 1,000 gallons of water. Add 1/4 oz. product per 1,000 gallons of water daily or as needed to maintain that level.

**FOR RESTARTING USE:**

- With pump running, place one (1) tablet per 10,000 gallons pool water every week or as needed to maintain 1-3 ppm available chlorine.

**STORAGE AND DISPOSAL**

- Do not contaminate water, food or feed by storage and disposal.

**PESTICIDE STORAGE:**

- Store in a dry, cool and well-ventilated area.
- Avoid moisture getting into container.
- Keep off wet floors.

**CONTAINER HANDLING:**

- Nonrefillable container. Do not reuse or refill this container.
- Rinse empty container thoroughly unless told to do so by the poison control center or doctor.
- Do not reseal container. If possible, isolate container with water to dissolve all material prior to disposal.
- Offer for recycling, if available.

**ENVIRONMENTAL HAZARDS:**

- This pesticide is toxic to fish and aquatic organisms.

**PHYSICAL OR CHEMICAL HAZARDS:**

- Use only clean dry utensils. Mix only into a suitable feeder like a floating dispenser or directly into a skimmer basket or automatic chlorinator. Repeat additions or as needed to maintain that level.

**NOTE TO PHYSICIAN**

- Probable mucosal damage may contraindicate the use of gastric lavage.

**IF SWALLOWED**

- Call a poison control center or doctor for treatment advice.

**IF IN EYES**

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

**IF INHALED**

- Move person to fresh air. If person is not breathing, call 911 or an emergency number immediately.
- If breathing returns, continue artificial respiration until emergency help arrives.

**IF SKIN IS EXPOSED**

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

**IF INHALED**

- Do not breathe dust or spray mist. Irritating to nose and throat. Harmful if inhaled.

**DIRECTIONS FOR USE**

- In case of contamination or decomposition do not reseal container. If possible, isolate container with water to dissolve all material prior to disposal.

**TESTING**

- STRONG OXIDIZING AGENT: Use only clean dry utensils. Mix only into a suitable feeder like a floating dispenser or directly into a skimmer basket or automatic chlorinator. Repeat additions or as needed to maintain that level.

**REENTRY INTO WORK AREA**

- Approximately 5 ppm (mg/L) of available chlorine. If the combined chlorine reading is not below 0.5 ppm (mg/L) and the combined chlorine level is above 0.5 ppm (mg/L), add 1.25 oz. product per 1,000 gallons of water. Add 1/4 oz. product per 1,000 gallons of water daily or as needed to maintain that level.

NOTE TO PHYSICIAN

FOR START UP OF NEWLY FILLED POOLS:

Before using this product, add stain and scale inhibitor to prevent staining of pool surface due to metals. When using other

products as outlined in the directions for this product, always follow directions on those products.

When used as directed, this product is effective as a swimming pool water

disinfectant. The dosage necessary for your pool will change considerably depending upon those factors that burden the

disinfection system. Some of the factors that will vary the required dosages are water temperature, bather load, exposure

or as needed to maintain that level. With pump running, place one (1) tablet per 10,000 gallons pool water every week

available chlorine, add 1.25 oz. product per 1,000 gallons of water. Add 1/4 oz. product per 1,000 gallons of water daily

added on a weekly basis.

FOR SUPERCHLORINATION:

measured by a suitable test kit. Add a sufficient amount of an appropriate shock product directly to the surface of

FOR MEASUREMENT OF AVAILABLE CHLORINE:

the chlorine reading is not below 0.5 ppm (mg/L), repeat the shock treatment described above. For example, the addition of

10 ounces of sodium dichloro-s-triazinetrione per 10,000 gallons of water (7.5 grams per 1,000 liters) will provide

In case of contamination or decomposition do not reseal container. If possible, isolate container

Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly

CONTAINER HANDLING:

Office for guidance.

PESTICIDE STORAGE:

rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact

your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional

area.

EMERGENCY HANDLING:

In case of spillage, wash with large amounts of water. After each use, keep container tightly closed. Oxidizing

Avoid contact with organic material.
