PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DANGER: Caused skin burns. Causes irreversible eye damage. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Harmful if ingested. Do not breathe vapor or spray mist. Wear coversalls worn long-sleeved shirt and gloves, avoid contact with skin and hair. When handling, wash exposed skin and any exposed skin. Avoid going near or sitting on the ground, chemical-resistant gloves made of any waterproof material. Wash hands thoroughly before eating, drinking, chewing gum, using tobacco or using the toilet.

User Safety Recommendations

Follow manufacturer’s instructions for cleaning/ maintaining PPE. If no such instructions exist, follow local and vendor’s recommendations. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been dried or heavily contaminated with this product’s concentrate. Do not reuse them.

FIRST AID:

If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor for treatment.

If On Skin or Clothing: Take off contaminated clothing. Rinse skin thoroughly with water for 15 minutes. Put on approved safety eye protection and wash exposed eyes thoroughly for 15 minutes. Call a Poison Control Center or doctor for treatment.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an emergency number and follow first aid procedures. If breathing is not rapid, give artificial respiration. If unconscious, give first aid while keeping person warm; have physician or qualified person give resuscitation if necessary. Call a Poison Control Center or doctor for treatment.

If Swallowed: Do not induce vomiting. Call a Poison Control Center or doctor for treatment.

Note to Physician: Possible mucosal damage may contraindicate the use of adrenocorticosteroids if any. If Inhaled: Prove inocularized with protective eyewear and respiratory equipment.

In case of emergency, for additional information call 1-800-654-6911.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge this product containing this product into lakes, ponds, streams, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority had been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your state water board or regional office of the EPA.

General Recommendations:

The concentration required to give protection depends on several factors. These include the susceptibility of the system to microbiological degradation, the extent to which microorganisms can gain access, the species involved, pH, temperature, and length of time for which protection is desired. These factors may vary with differences in water hardness and mineral content, seasonal and geographic conditions, and the concentration of other chemicals in the water. For protection against bacterial attack, a concentration within the range of 0.04 – 0.7% of this product is almost invariably sufficient. The control of mold growth, particularly on paste products of high solids content, may occasionally demand dosages above 0.5%. In dilute fluid systems, spoilage is usually controlled with dosages not greater than 0.18%.

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Protect from frost. If frozen, allow to thaw and stir well before use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. Pesticide formulation of these products are exempted from the requirements of a tolerance when used in accordance with good agricultural practice as inert (or occasional inert). Consult your State Pesticide or Environmental Control Agency, or the hazardous waste representative at the nearest EPA regional office for guidance. Triple rinse containing this product to sewer systems without previously notifying the local sewage treatment plant authority. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority had been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your state water board or regional office of the EPA.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse container promptly after emptying. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product is an effective preservative in most aqueous compositions. Typical applications, and the suggested range of concentrations on which trials can be based are:

For Industrial Use Only as a Microbiostat Preservative for Aqueous Compositions such as Leather, Paper coating compositions, Pigment dispersions, Paints, Water-based adhesives, PaperCoating Compositions, Casein/Rosin Dispersions, Tape Joint Compounds, Tape Joint Compounds, Paper Coating Compositions, Casein/Rosin Dispersions, Tape Joint Compounds, Tape Joint Compounds, Latices, Emulsion Paints and Stains, and in Latices, Emulsion Paints and Stains, and in Pigment dispersions and pigment cakes, add 0.10 % of this product (based on total weight of product). In dilute fluid systems, spoilage is usually controlled with dosages not greater than 0.18%.

Photographic Emulsions: To preserve the integrity of photographic emulsions and photo processing rinse solutions, add 0.08 – 0.67% of this product (based on total weight of product).

Leaves: Natural and synthetic lattices based on acrylate, butadine, PVA, styrene and other monomers, for use in various applications, eg, wax, paint, polishes, synthetic rubber lattices, add 0.10 - 0.50% of this product (based on total weight of product).

For Industrial Use Only as a Microbiostat Preservative for Aqueous Compositions such as Leather, Paper coating compositions, Pigment dispersions, Paints, Water-based adhesives, PaperCoating Compositions, Casein/Rosin Dispersions, Tape Joint Compounds, Paper Coating Compositions, Casein/Rosin Dispersions, Tape Joint Compounds, Tape Joint Compounds, Latices, Emulsion Paints and Stains, and in Latices, Emulsion Paints and Stains, and in Pigment dispersions and pigment cakes, add 0.10 % of this product (based on total weight of product). In dilute fluid systems, spoilage is usually controlled with dosages not greater than 0.18%.
