Prescription Treatment \textsuperscript{TM} brand

Ultra-Pure Oil

Horticultural, Insecticide, Miticide and Fungicide

\textbf{ACTIVE INGREDIENT:} Mineral Oil \textsuperscript{*} \hspace{1cm} \textbf{BY WEIGHT} 98.00\%

\textbf{INERT INGREDIENTS:} \hspace{1cm} \textbf{TOTAL:} 100.00\%

Unsulphonated Residue \hspace{1cm} 99.00\% (minimum)

Aromatic Composition by ASTM D2140 \hspace{1cm} 0.00\%

\textsuperscript{*}Contains petroleum distillates

EPA Reg. No. 69526-5-499 \hspace{0.5cm} \textbf{KEEP OUT OF REACH OF CHILDREN}

\textbf{CAUTION}

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

\textbf{FIRST AID}

\textbf{IF SWALLOWED:}
\begin{itemize}
  \item Immediately call a poison control center or doctor.
  \item Do not induce vomiting unless told to by a poison control center or doctor.
  \item Do not give any liquid to the person.
  \item Do not give anything by mouth to an unconscious person.
\end{itemize}

\textbf{IF ON SKIN OR CLOTHING:}
\begin{itemize}
  \item Take off contaminated clothing.
  \item Rinse skin immediately with plenty of water for 15 – 20 min.
  \item Call a poison control center or doctor for treatment advice.
\end{itemize}

\textbf{IF IN EYES:}
\begin{itemize}
  \item Hold eye open and rinse slowly and gently with water for 15 – 20 min.
  \item Remove contact lenses, if present, after the first 5 min, then continue rinsing eye.
  \item Call a poison control center or doctor for treatment advice.
\end{itemize}

\textbf{IF INHALED:}
\begin{itemize}
  \item Move person to fresh air.
  \item If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
  \item Call a poison control center or doctor for further treatment advice.
\end{itemize}

\textbf{NOTE TO PHYSICIAN:} Petroleum distillate poses aspiration pneumonia hazard. Only minor irritation should be expected from any type of exposure other than pulmonary aspiration. Ingestion may result in some gastroenteritis and mild diarrhea. Since systemic toxicity is not expected, the added risk of aspiration from attempts to induce vomiting or lavage are deemed not warranted.

\textbf{FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL:} 1-800-832-HELP or a poison control center.

\textbf{NET CONTENTS:} 2.5 Gallon (9.46 L)

Product of Canada.
Ultra-Pure™ Oil

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Harmful if swallowed. Harmful if absorbed through skin. Avoid contact with eyes, skin, or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals.

PERSONAL PROTECTIVE EQUIPMENT (PPE): Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on the EPA chemical resistance category selection chart.

APPLICATORS AND OTHER HANDLERS MUST WEAR: Long-sleeved shirt and long pants, chemical-resistant gloves (such as Barrier Laminate, Nitrile rubber, Butyl, Neoprene rubber or Viton) and shoes plus socks. Follow manufacturer’s instructions for cleaning and maintaining PPE. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discard clothing and other absorbent materials that have been drenched or heavily damaged by this product’s concentrate. Do not reuse them.

ENGINEERING CONTROLS STATEMENTS: When handlers use closed systems or enclosed cabs in a manner that meets with requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240 (d) (4)-(6)), the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS
Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing and PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by storage or disposal. Do not contaminate water, food, or feed by storage or disposal. Do not contaminate water, food, or feed by storage or disposal.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

Do not apply this product through any type of irrigation system. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Aerial application of this product is prohibited.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plant, soil, or water, includes: coveralls, shoes plus socks and chemical-resistant gloves made of any waterproof material.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not enter or allow others to enter treated area until sprays have dried.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or dilute material into food or drink containers. Do not contaminate other pesticides, fertilizers, water, food, or feed by storage or disposal.

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. To confine spill: If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to prevent dispersal.

Place damaged package in a holding container. Identify contents. In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. To confine spill: If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to prevent dispersal.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 sec after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 sec. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 sec after the flow begins to drip. Repeat this procedure two more times. If recycling is unavailable, puncture and dispose of in sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out smoke.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to interstitial areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters or rinseate. Apply this product only as specified on the label.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

Do not apply this product through any type of irrigation system. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AERIAL APPLICATION REQUIREMENTS

Aerial application of this product is prohibited.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls, shoes plus socks and chemical-resistant gloves made of any water-proof material.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not enter or allow others to enter treated area until sprays have dried.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or dilute material into food or drink containers. Do not contaminate other pesticides, fertilizers, water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Non-Refillable container. Do not reuse or refill this container. Offer for recycling if available. Follow the instructions for category E on the EPA chemical resistance category selection chart. Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on the EPA chemical resistance category selection chart.

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on the EPA chemical resistance category selection chart.

USERS SHOULD:

**APPLICATION RATE & TIMING**

Do not apply micronized sulfur within 10 days of an oil application and do not apply within 14 days of an application of wettable or dusting sulfur.

This product has not been tested on all species or varieties. Before treating a large area, treat a small area and observe prior to full scale application.

A period of 14 days must elapse before any of the following chemicals are used before or after an application of this product:

- anilazine (Dyrene), chlorothalonil (Bravo), dicloran (Botran), dicofol (Kelthane), Dikar, dinocap (Karathane), permethrin (Ambush, Pounce).

Do not use chlorothalonil (Bravo) or dimethoate (Cygon) in a spray program with this product on grapes, ornamentals and strawberries. Do not use dicofol (Kelthane) in a spray program with this product on ornamentals and strawberries.

- Use 1−2 gal per 100 gal of water at 100−800 gal per acre.

### Thorough coverage spray (TC)
Applications achieving a uniform film wetting of all portions of the tree at 250–2,000 gal of spray solution per acre. The total volume is dependent on the size of the trees. Do not exceed a maximum of 270 lb of active ingredient in a maximum volume of 2,000 gal of spray mix per acre when treating citrus in California (based on thorough coverage spray, with 1.5 gal of product mixed per 100 gal of water).

| Mites: Citrus Bud, Citrus Flat, Citrus Red, Citrus Rust | Southern California: Apply 0.5 – 1.5 gal of oil per 100 gal water as a thorough coverage spray (TC). Alternately, use a low volume spray (LV) to apply 1 – 10 gal of oil per acre. COMMENTS: For Coastal Lemons and Limes, apply May and June and/or September through December. For Interior Lemons and Limes, apply in April and May and/or September through November. Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre. COMMENTS: For Lemons and Limes, make applications in all months except December through February; for Grapefruit make applications July through October; for Oranges make applications on Navels July through September and on Valencia, Tangelos and Tangerines and other citrus hybrids July through October. |
| --- |
| Scales: Black, Brown Soft, California Red, Citrusola, Purple, Yellow, Red | Oxnard Plains Area: Apply 0.5 – 1.5 gal of oil per 100 gal of water as a thorough coverage spray (TC). Alternately, use a low volume spray (LV) to apply 1 – 10 gal of oil per acre. Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre. COMMENTS: Make applications as needed throughout the year. |

### Low-volume spray (LV)
Applications with droplet depositions achieved on all interior and exterior parts of the tree using 10 – 100 gal of spray solution per acre. Do not apply prior to or during a period of excessively high temperatures. Do not apply spray when trees show stress. Consult with your local University of California Cooperative Extension Specialist for proper timing and spray program.

Dilute spray: Apply the spray oil application rate in up to 1,500 gal of water per acre, or 10 – 12 gal per tree, to over 15 gal per tree for large trees. Best results can be obtained when the oil is added to a partially filled spray tank under proper agitation and all foliage is thoroughly covered. Do not exceed a maximum of 159 lb of active ingredient in a maximum volume of 2,000 gal of spray mix per acre when treating citrus in Florida and Texas (based on thorough coverage spray, with 1.5 gal of product mixed per 100 gal of water).

Precautions in the use of oil include: Do not apply oil when trees are wilting. Do not apply oil and sulfur within 3 weeks of each other in Florida or Texas. Oil spray applied after October 1 may increase susceptibility of trees to cold damage and may reduce the fruit crop the following year. Oil sprays applied in the fall may inhibit solids formation in the juice and retard coloring of fruit and increase susceptibility of trees to cold damage and may reduce the fruit crop the following year. Oil sprays applied in the fall may inhibit solids formation in the juice and retard coloring of fruit and should not be applied within 60 days of anticipated harvest. Sensitive foliage may be injured.

Florida growers consult the Florida Citrus Spray and Dust Schedule, or your Agricultural Experiment Station or State Extension Service Specialist for complete details on the spraying program best suited to your locale.

Texas growers consult with your Agricultural Experiment Station or State Extension Specialist for complete details on the spraying program suited to your locale.

<td>Mealybug, Mites, Leafhopper*, Whiteflies* Powdery Mildew</td>
<td>DORMANT: Use 1 – 3 gal plus the appropriate label rate of insecticide registered for use on grapes in 200 – 300 gal of water per acre. DO NOT apply over 300 gal of water per acre.</td>
</tr>
</tbody>
</table>

**COMMENTS:** Do not apply over 300 gal of water per acre. Using ground equipment, spray for optimum coverage of leaf surfaces. Repeat sprays every 10 – 14 days. For powdery mildew: Make first application pre-bloom and continue every 10 days – 3 weeks depending on level of disease pressure. Use higher rate and/or shorter spray interval when disease conditions are severe. Oil will remove the bloom on grapes. Table grapes should not be sprayed within 60 days of harvest. On grapes, do not tank mix oil and copper more than once per season. Do not use copper and oil together with fruit present.

<tbody>
<tr>
<td>Black Scale, Calico Scale, European Fruit Locustium Scale, Frosted Scale, Olive Scale, San Jose Scale, European Red Mite Eggs, Walnut Ashed Eggs</td>
<td>DELAYED DORMANT: Use 4 – 6 gal per acre in 200 – 500 gal of water per acre.</td>
</tr>
</tbody>
</table>

**COMMENTS:** Use only on trees that have not suffered from lack of moisture at any time during the growing season. Do not apply to orchards where soil moisture is low. Trees must be fully dormant. Do not apply after husk split.
### SUMMER FOLIAR (when leaves fully expanded)

Use 4 – 6 gal per acre in 200 – 500 gal water per acre.

### VEGETABLE CROPS OUTDOOR AND GREENHOUSE

- **ASPARAGUS, BEANS, BEETS, CABBAGE, CAULIFLOWER** and other Cole crops, Celery, CUCURBITS, EGGPLANT, LETTUCE, MELON, PEPPER, POTATO, PUMPKIN, RADISH, SQUASH, SWEET POTATO, TOMATO, HERBS AND SPICES (Curly Leaf Basil, Lemon Balm, Mexican Oregano, Mint), ORIENTAL VEGETABLES (Acerola, Atemoy, Balsam pear (Bitter melon), Carambola, Chinese broccoli (Gai Loi), Chinese cabbage (Gai Choy), Chinese spinach, Chinese waxgourd, Cilantro, Citron melon, Dashiine, Ginger, Ginseng, Japanese artichoke, Japanese radish (Daikon), Rambutan).

#### PESTS APPLICATION RATE & TIMING (gallons of oil per 100 gal of water)

<table>
<thead>
<tr>
<th>Pests</th>
<th>Application Rate &amp; Timing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Mites, Beetle Larvae, Leaflines, Thrips, Leafhopper, Whitefly, Powdery Mildew</td>
<td>0.25 – 1</td>
</tr>
</tbody>
</table>

**COMMENTS:** For virus control on cucurbits use 0.75 gal per 100 gal. Spray once or twice weekly depending on the rapid growth of the crop and/or vector pressure. When using to control insect transmitted diseases, use higher pressure 400 psi and ceramic hollow cone nozzles.

### ORNAMENTALS

#### FOLIAGE ORNAMENTALS & BEDDING PLANTS:

<table>
<thead>
<tr>
<th>Pests</th>
<th>Application Rate &amp; Timing (ounces of oil per gallon of water)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Adelgids</td>
<td>1 – 2.5 oz/gal</td>
</tr>
</tbody>
</table>

**COMMENTS:** Summer (Foliar or Cover): Do not spray plants during flowering.

#### SHADE TREES** AND SHRUBS INCLUDING CONIFERS, DECIDUOUS BROADLEAF EVERGREENS & WOODY ORNAMENTALS, ORNAMENTAL TREES**, SHRUBS ALONG CITY STREETS, OTHER RIGHTS-OF-WAY INCLUDING CONIFERS, DECIDUOUS AND BROADLEAF EVERGREENS:

<table>
<thead>
<tr>
<th>Pests</th>
<th>Application Rate &amp; Timing (ounces of oil per gallon of water)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Adelgids, Eriophyid Mites, Gall Mites, Honey Locust Plant Bug, Lace Bug, Leaf Beetle Larvae, Leaflines, Leafrollers, Mealybugs, Psyllids (immature), Red Mites, Sawfly (larvae), Scales (immature), Spider Mites, Webwars, Whiteflies</td>
<td>2.5 – 4 oz/gal</td>
</tr>
</tbody>
</table>

**Winter Dormant Period:**

Do not spray more than 1 time per week. Do not spray when there is obvious moisture deficit in leaves or the plant is under stress. For fall dormant applications, reduce rate to 2 gal oil per 100 gal water and limit use only to: American Red Oak, Japanese Black Pine, Dogwood, Weeping Cherry, Camellia Cherry, Crabapple, Norway Maple, Purple Plum.

**NOTE:** May cause discoloration of Blue Spruce. Do not use on conifers or ferns not tolerant to oil sprays. Use enough spray solution to completely penetrate the leaf canopy and cover both top and bottom of all of the leaves and stems until wet but without significant runoff.

#### FLOWERING AND FOLIAGE PLANTS INCLUDING ROSES AND OTHER FLOWERING SHRUBS DURING WINTER AND DORMANT PERIODS:

<table>
<thead>
<tr>
<th>Pests</th>

<td>0.5</td>
</tr>
</tbody>
</table>

**COMMENTS:** Due to varietal differences in response to a treatment of this product at the specified rate, we recommend conducting a small test on 1 or 2 plants of the specific variety to be treated.

### LEAF POLISH FOR HARDY PLANTS:

<table>
<thead>
<tr>
<th>Pests</th>
<th>Application Rate &amp; Timing (ounces of oil per gallon of water)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Fungus Gnats, Leafminers, Mealybugs, Scales (soft &amp; hard), Spider Mites, Thrips, Whitefly, Powdery Mildew</td>
<td>0.5</td>
</tr>
</tbody>
</table>

**COMMENTS:** Due to varietal differences in response to a treatment of this product at the specified rate, we recommend conducting a small test on 1 or 2 plants of the specific variety to be treated.

### NOT TO USE ON:

- **COPPER SULFATE**: May cause discoloration of Blue Spruce. Do not use on conifers or ferns not tolerant to oil sprays. Use enough spray solution to completely penetrate the leaf canopy and cover both top and bottom of all of the leaves and stems until wet but without significant runoff.

### TENDENCY TOWARD SENSITIVITY:

- Red Cedar and Douglas Fir.

**Note:** May cause discoloration of Blue Spruce. Do not use on conifers or ferns not tolerant to oil sprays. Use enough spray solution to completely penetrate the leaf canopy and cover both top and bottom of all of the leaves and stems until wet but without significant runoff.

### TENDENCY TOWARD SENSITIVITY:

- Red Cedar and Douglas Fir.
AGLANEMA, ASTER, AZALEAS, BEGONIAS, BROWALLIA, CAMELLIAS, CARNATION, CELOSIA, CHRYSANTHEMUM, COLEUS, COSMOS, DUSTY MILLER, EASTER LILIES, GARDENIAS, GERBERA, HELLCYRHYSUM, HIBISCUS FOLIAGE, HYDRANGEA, JADE PLANT, MARIGOLD, NEW GUINEA IMPATIENS, NICOTONIA, PHILEDELPHEON, PORTULACA, REIGER BEGONIAS, SNAPDRAGON, ZINNIAS:

<table>
<thead>
<tr>
<th>PESTS</th>
<th>APPLICATION RATE &amp; TIMING (gallons of oil per 100 gal of water)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Fungus Gnats, Leafminers, Mealybugs, Scales (soft &amp; hard), Spider Mites, Thrips, Whitefly, Powdery Mildew</td>
<td>1 – 2</td>
</tr>
</tbody>
</table>

**COMMENTS:** Due to varietal differences in response to a treatment of this product at the specified rate, we recommend conducting a small test on 1 or 2 plants of the specific variety to be treated.

Some plants are more sensitive to oil treatments if any of the following conditions are present when application is made: High humidity (74%), an overcast or cloudy day, inadequate air flow, a small greenhouse where the sunlight is magnified causing a fast build-up of temperature and light intensity.

CORN (Sweet & Field), SUGAR BEETS:

<table>
<thead>
<tr>
<th>PESTS</th>
<th>APPLICATION RATE &amp; TIMING (gallons of oil per 100 gal of water)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Mites, Leafminers, Corn Earworm, Rootworm, Armyworm, Whitefly</td>
<td>Corn: 1 – 2 Sugar Beets: 2</td>
</tr>
</tbody>
</table>

HOPS*:

<table>
<thead>
<tr>
<th>PESTS</th>
<th>APPLICATION RATE &amp; TIMING (gallons of oil per 100 gal of water)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mites, Powdery Mildew</td>
<td>1 – 2</td>
</tr>
</tbody>
</table>

**COMMENTS:** For powdery mildew: Initiate sprays at early leaf stage. Continue sprays every 10 – 14 days. Mite control will be effective under the same spray interval as powdery mildew sprays. Discontinue sprays at burr development.

TOBACCO:

<table>
<thead>
<tr>
<th>PESTS</th>

</tr>
</thead>
<tbody>
<tr>
<td>Aphids, Mites, Beetle Larvae, Leafminers, Thrips, Leathopper, Whitefly</td>
<td>0.75 – 1</td>
</tr>
</tbody>
</table>

*Asterisk denotes crop, pest Not approved in California.

This product has not been tested on all species or varieties. Before treating a large area, treat a small area and observe prior to full scale application.

**CONDITIONS OF SALE AND LIMITATIONS OF WARRANTY AND LIABILITY:**

It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Whitmire, the Manufacturer or Seller. To the extent consistent with applicable laws, all such risks shall be assumed by the Buyer. To the extent consistent with applicable law neither Whitmire, the Manufacturer or Seller shall be liable for consequential, special or indirect damages resulting from the use or handling of this product. Except as warranted by this label, Whitmire, the Manufacturer or Seller makes no warranties, guarantees, or representations of any kind, either express or implied, or by usage of trade, statutory or otherwise, with regard to the product sold, including, but not limited to, merchantability, fitness for a particular purpose, use or eligibility of the product for any particular trade usage. Except as provided by applicable law, buyer’s or user’s exclusive remedy, and Whitmire’s, the Manufacturer’s or Seller’s total liability, shall be for damages not exceeding the cost of the product.

**PRODUCER’S RESPONSIBILITY**: This product is phytotoxic and cause damage to certain species of plants. Read label carefully. Approved for outdoor use. Avoid drift onto non-target plants. Do not use on citrus. Avoid damaging the foliage of such crops as melons, cucumbers, squashes, and other Members of the Cucurbitaceae family. This product may cause injury to some ornamental crops. Avoid exposure to the foliage of such crops as corn, tobacco, and hops. Apply only as directed.

INERT INGREDIENTS: .................................................................................................... 2.00%
Unsulphonated Residue ............................................................................................ 99.00% (minimum)
Aromatic Composition by ASTM D2140 ........................................................................ 0.00%

*Contains petroleum distillates

EPA Reg. No. 69526-5-499  •  EPA Est. No. 79693-CAN-001

KEEP OUT OF REACH OF CHILDREN

CAUTION

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

FIRST AID

IF SWALLOWED:
• Immediately call a poison control center or doctor.
• Do not induce vomiting unless told to by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 – 20 min.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15 – 20 min.
• Remove contact lenses, if present, after the first 5 min, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Petroleum distillate poses aspiration pneumonia hazard. Only minor irritation should be expected from any type of exposure other than pulmonary aspiration. Ingestion may result in some gastroenteritis and mild diarrhea. Since systemic toxicity is not expected, the added risk of aspiration from attempts to induce vomiting or lavage are deemed not warranted.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 1-800-832-HELP or a poison control center.

NET CONTENTS: 30 Gal (113.56 L)

Product of Canada.
When handlers use closed systems, Ultra-Pure™ Oil is used. Regulation for pesticide products is specific to your state or tribe, consult the agency responsible for pesticide drift. Only protected handlers may be in the area during application. For any requirements pertaining to the label, follow the instructions for category E on the EPA chemical resistance category selection chart.

**PERSONAL PROTECTIVE EQUIPMENT (PPE):** Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on the EPA chemical resistance category selection chart.

**APPLICATORS AND OTHER HANDLERS MUST WEAR:** Long-sleeved shirt and long pants, chemical-resistant gloves (such as Barrier Laminate, Nitrile rubber, Butyl, Neoprene rubber or Viton) and shoes plus socks. Follow manufacturer’s instructions for cleaning and maintaining PPE. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily damaged by this product’s concentrate. Do not reuse them.

**ENGINEERING CONTROLS STATEMENTS:** When handlers use closed systems or enclosed cabs in a manner that meets with requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

**USER SAFETY RECOMMENDATIONS**

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing and/or PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters or rinsate. Apply this product only as specified on the label.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation. Aerial application of this product is prohibited.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls, shoes plus socks and chemical-resistant gloves made of any waterproof materials.

**NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not enter or allow others to enter treated area until sprays have dried.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or dilute material into food or drink containers. Do not contaminate other pesticides, fertilizers, water, food, or feed by storage or disposal. In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. To confine spill: If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to prevent dispersal. Place damaged package in a holding container. Identify contents.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip the container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 sec. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. If recycling is unavailable, puncture and dispose of in sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or diluted material into food or drink containers. Do not contaminate other pesticides, fertilizers, water, feed, or food by storage or disposal.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse (or equivalent) promptly after emptying. Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip the container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 sec. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times.

Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times. If recycling is unavailable, puncture and dispose of in sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**MIXING INSTRUCTIONS**

1. Use only in equipment with sufficient agitation to keep spray thoroughly mixed. Be sure tank is clean.
2. With agitator running, start filling tank with water.
3. Add oil when tank is about 1/2 full. Pump this mixture through the overflow and back into tank for about two minutes. If this mixture turns white, it indicates good emulsification.
4. Fill the tank with water, adding other desired materials as tank is filling. If wettable powders are used, add and thoroughly mix before adding oil.
5. Observe all cautions and limitations on labeling of all products used in mixing. Keep agitator running at all times. If an injector is used, first add 25 – 50 gal of water to tank with engine running to provide good pressure.
6. Put injector suction tube into the measured amount of spray oil, opening injector valve to allow the oil to be sucked into the tank, then fill the tank with water.

**DO NOT USE THIS MATERIAL IF IT DOES NOT EMULSIFY.**

**USE RESTRICTIONS AND PRECAUTIONS**

Preharvest Interval - This product may be used up to the day of harvest.

To ensure the best coverage, dilute applications (greater than 150 gal of spray solution per acre) are recommended. Concentrate applications (usually from 20 – 150 gal of spray solution) may reduce the coverage and thus the effectiveness. Application volumes depend on the crop type, crop size and target pest. Adjust the spray volume to obtain the best coverage without runoff. Extreme care

**NOTE:** Same size and application on the following 6 PDF pages which are pages 3-8 of the booklet.
**SPRAY DRIFT MANAGEMENT**

A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, and relative humidity) and method of application (e.g., ground or airblast) can influence pesticide drift. The applicator and grower must evaluate all factors and make appropriate adjustments when applying this product.

**Wind Speed:** Do not apply at wind speeds greater than 15 mph at the application site.

**Temperature Inversions:** If applying at wind speeds less than 5 mph, the applicator must determine if (a) conditions of temperature inversion exist, or (b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

**Release Height:** Applying using a nozzle height of no more than 4 ft above the ground or crop canopy.

**Droplet Size:** Apply as a medium or coarser spray (ASTM Standard 572), and the minimum volume mean diameter (MVMD) for spinning atomizer nozzles. For airblast applications, turn off outward-pointing nozzles at row ends and when spraying outer rows. To minimize spray loss over the top in orchard applications, spray must be directed into the canopy.

**Comments:** Certain varieties of plums and prunes may be injured by oil sprays, check for tolerance prior to treatment. Do not apply to trees lacking moisture.

### Pests

#### Citrus: (California Only)

- **Lemons, Grapefruit, and Oranges (Navel and Valencia), Limes, Tangelos, and Tangerines and other Citrus Hybrids**
  - **Application Rate & Timing**
    - Using ground equipment, spray for optimum coverage of leaf surfaces.

#### Blueberries*, Bushberries*, Caneberrys:

#### Bananas, Plantains:

#### Avocados:

#### Plums and Prunes: (Sacramento Valley of California Only)

- **Yellow, Red, Citricola, Purple,**
- **Black, Brown Soft, California Red, Citrusola, Purple,**
- **Yellow, Red**

#### Cottony Peach Scale

- **Dormant:** 1.5 – 2 gal per 100 gal of water at 300 – 600 gal per acre.
- **Foliar Spray:** Use 0.5 – 1 gal per 100 gal of water at 300 – 600 gal per acre.

**Comments:** Apply before buds begin to swell in the spring. Make 2 applications 7 – 14 days apart, according to local recommendations during the dormant period.

#### Terrapin Scale

- **Foliar Spray:** Use 10 gal of oil per acre. Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LVS) 1 – 10 gal of oil per acre.

**Comments:** For Lemons and Limes, make applications in all months except December through February; for Grapefruit make applications July through October; for Oranges make applications in November through September and on Valencia, Tangelos and Tangarines and other citrus hybrids, July through October.

**Note:** Continues on next page.
### APPLICATION RATE & TIMING

**Southern California:** Apply 0.5 – 1.5 gal of oil per 100 gal water as a thorough coverage spray (TC). Alternately, use a low volume spray (LV) to apply 1 – 10 gal of oil per acre.

**Comments:** For Coastal Lemons and Limes, apply May and June and/or September through December. For Interior Lemons and Limes, apply in April and May and/or September through November.

Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre.

Apply as a low volume spray (LV) 1 – 10 gal of oil per acre. Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre.

### Mites:
- Citrus Bud, Citrus Flat, Citrus Red, Citrus Rust

### Scales:
- Black, Brown Soft, California Red, Citrusola, Purple, Yellow, Red

### Oxnard Plains Area: 
Apply 0.5 – 1.5 gal of oil per 100 gal water as a thorough coverage spray (TC). Alternately, use a low volume spray (LV) to apply 1 – 10 gal of oil per acre. Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre.

### Comments:
Make applications as needed throughout the year.

### Florida Citrus Spray and Dust Schedule

- **Southern California:** Apply 0.5 – 1.5 gal of oil per 100 gal water as a thorough coverage spray (TC). Alternately, use a low volume spray (LV) to apply 1 – 10 gal of oil per acre.

- **Comments:** For Coastal Lemons and Limes, make applications in all months except December through February; for Grapefruit make applications July through October; for Oranges make applications in Navels July through September and in Valencias, Tangelos and Tangerines and other citrus hybrids July through October.

- **Oxnard Plains Area:** Apply 0.5 – 1.5 gal of oil per 100 gal water as a thorough coverage spray (TC). Alternately, use a low volume spray (LV) to apply 1 – 10 gal of oil per acre. Apply up to 10 gal of oil per acre on bearing trees up to 10 ft in height. Add 1 gal of oil per acre for each foot of tree height over 10 ft. Apply as a low volume spray (LV) 1 – 10 gal of oil per acre.

### Low-volume spray (LV):
- Applications with droplet depositions achieved on all interior and exterior parts of the tree using 10 – 100 gal of spray solution per acre.

<td></td>
</tr>
</tbody>
</table>

Dilute spray: Apply the spray oil application rate in up to 1,500 gal of water per acre, or 10 – 12 gal per tree, to over 15 gal per tree for large trees. Best results can be obtained when the oil is added to a partially filled spray tank under proper agitation and all foliage is thoroughly covered. Do not exceed a maximum of 15 lb of active ingredient (in a maximum volume of 1,500 gal of spray mix) per acre when treating citrus in Florida and Texas (based on dilute spray, with 1.5 gal of product mixed per 100 gal of water).

Precautions in the use of oil include: Do not apply oil spray when trees are wilting. Do not apply oil and sulfur within 3 weeks of each other in Florida or Texas. Oil spray applied after October 1 may increase susceptibility of trees to cold damage and may reduce the fruit crop the following year. Oil sprays applied in the fall may exhibit solids formation in the juice and retard coloring of fruit and should not be applied within 60 days of anticipated harvest. Sensitive foliage may be injured.

Florida growers consult the Florida Citrus Spray and Dust Schedule, or your Agricultural Experiment Station or State Extension Service Specialist for complete details on the spraying program best suited to your locale.

Texas growers consult with your Agricultural Experiment Station or State Extension Specialist for complete details on the spraying program suited to your locale.

<tbody>
<tr>
<td>1 – 2.5 oz/gal</td>
</tr>
</tbody>
</table>

**COMMENTS:**
Do not spray more than 1 time per week. Do not spray when there is obvious moisture deficit in leaves or the plant is under stress.
For fall dormant applications, reduce rate to 2 gal oil per 100 gal water and limit use only to: American Red Oak, Japanese Black Pine, Dogwood, Weeping Cherry, Cornelian Cherry, Crabapple, Norway Maple, Purple Plum.
**NOTE:** May cause discoloration of Blue Spruce. Do not use on conifers or fenn not tolerant to oil sprays. Use enough spray solution to completely penetrate the leaf canopy and cover both top and bottom of all of the leaves and stems until wet but without significant runoff.
