**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

Do not ingest. Do not get in eyes, on skin or on clothing. Wear protective gloves when handling. Do not expose to flame or heat. Do not store in direct sunlight. Do not use in swimming pools or spas where children are present or where there is a high percentage of bather contact. Do not use in methods or equipment that produce heat. Do not use in conditions that may produce fire, explosion, and the release of toxic gases.

**METHOD OF APPLICATION:**

**DO NOT** Pre-mix this product. Only add this product directly to your pool. Do not allow this product to get damp or wet before use. Do not remove floater or other dispensing device from water for more than 5 minutes if it contains a treatment product. If product is exposed to small amounts of water, it can react and cause decomposition. Do not reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.

**ROUTINE CHLORINATION:вро**

**DO NOT** use this product in a floater or feeder that has been used with any other product. **DO NOT** use this product in a floater or feeder that has been used with any water treatment product. If product is exposed to small amounts of water, it can react and cause decomposition. **DO NOT** reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.

**WATER BALANCE:**

To provide optimum performance, swimmer comfort and crystal clear water, use a reliable test kit that measures all these ranges. Make necessary adjustments promptly with the Robarb Pool Specialties pH-Down. Adjust pH to 7.2 to 7.4 with Robarb Pool Specialties pH-Down. Do not allow this product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react and cause decomposition. **DO NOT** reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.

**SHOCK TREATMENT:**

As a preventative treatment, you must shock treat your pool by scrubbing surface of algae growth, vacuuming organic material and to keep water sparkling clear. Immediately after shock treatment, thoroughly clean and cycle through filter. If necessary, repeat the procedure. Pool must not be entered until the chlorine residual is 1-4 ppm as measured with a test kit or measurement device. **DO NOT** use in swimming pools or spas where children are present or where there is a high percentage of bather contact. Do not use in methods or equipment that produce heat. Do not use in conditions that may produce fire, explosion, and the release of toxic gases.

**RESUPPLYING:**

Robarb® Pool Specialties pH-Down is formulated to provide optimum pH after shock treatment. This product contains a non-ionic surfactant to help suspend the calcium and magnesium carbonate solids and maintain a clear water appearance. It is not necessary to add the product in large excess. **DO NOT** use this product to kill bacteria, control algae, burn out organic material and to keep water sparkling clear. This pesticide is toxic to sensitive biological systems. For this reason, always use the least amount that will do the job. Make sure equipment being used is thoroughly cleaned and ready to be used. Do not use this product to control weeds, grasses or other vegetation on land surfaces. Do not use this product in public swimming pools or other recreational water facilities. Always follow label directions. Shock treat weekly with a product containing a chlorine. **DO NOT** shock treat with Potassium Perchlorate or Potassium Permanganate. **DO NOT** use this product in swimming pools or spas where children are present or where there is a high percentage of bather contact. Do not use in methods or equipment that produce heat. Do not use in conditions that may produce fire, explosion, and the release of toxic gases. **DO NOT** use this product in a floater or feeder that has been used with any other product. **DO NOT** use this product in a floater or feeder that has been used with any water treatment product. If product is exposed to small amounts of water, it can react and cause decomposition. **DO NOT** reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.

**EMERGENCY HANDLING:**

**DO NOT** ingest this product. Do not get in eyes, on skin or on clothing. **DO NOT** use in swimming pools or spas where children are present or where there is a high percentage of bather contact. Do not use in methods or equipment that produce heat. Do not use in conditions that may produce fire, explosion, and the release of toxic gases. Have the product container or label with you when calling. **DO NOT** apply this product, or place in skimmer. **DO NOT** apply this product directly to your pool. **DO NOT** apply this product to contact other water treatment products. If product is exposed to small amounts of water, it can react and cause decomposition. **DO NOT** reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.

**USING WITH A FLOATER OR FEEDER:**

Use with any dispensing device from water for more than 5 minutes if it contains a treatment product. If product is exposed to small amounts of water, it can react and cause decomposition. **DO NOT** reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.

**CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.**

**METHOD OF STORAGE:**

Keep this product dry in its tightly closed container. Do not store in direct sunlight. Store at room temperature. This product is not flammable, but must be kept away from heat, flame and exposure to water. It is not self-igniting or explosive. **DO NOT** store near other products. On contact, it can react and cause decomposition. **DO NOT** reseal container. Immediately call a poison control center or doctor, or go for emergency medical treatment. Have the product container or label with you when calling.
