1. Assure cattle are provided this product on a daily basis.

2. Offer cattle 50 pounds of ClariFly® Larvicide Livestock Premix 0.04% with the ration to provide 0.15 mg of diflubenzuron insect growth regulator to prevent the emergence of adult flies for 15-20 minutes.

3. Use the following equation when calculating inclusion level based on a weight (lbs):  
   - Use the higher inclusion rate for lighter weight pigs.
   - Use the lower inclusion rate for heavier weight pigs.

4. Keep buildings in good repair and your grounds free of debris where flies can breed.  
   - Keep barn areas clean and dry as possible.  
   - Keep feed storage areas, bunks, and water troughs in good repair, clean, and as dry as possible.  
   - Keep grooms and feeders around barns, feeders, troughs, and other feeding areas dry and free of feed spillage.

5. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of the manufacturer and/or grower. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of the manufacturer and/or grower.

6. If intake of this product is below 0.4 ounces per 100 lbs. animal body weight per day or if it is not being provided every day, the expected efficacy may not be achieved.

7. If in Eyes:  
   - Remove any contact lenses if present and wash out with large amounts of cool water for 15-20 minutes.
   - If irritation persists, call a doctor, or going for treatment.  
   - For additional information on this pesticide see safety data sheet, label, or doctor.  
   - If in Skin:  
     - Wash the exposed skin area thoroughly with soap and water for 15-20 minutes.
     - If irritation persists, call a doctor, or going for treatment.  
     - Change clothing if necessary.

8. This pesticide is toxic to aquatic life with long-term exposure.  
   - Avoid dispersal on or near water.  
   - Do not apply directly to water, or to areas where surface water is present or to manure management systems, fish habitats, or areas frequented by wildlife, except as directed on the label.

9. Avoid dispersal on or near water.  
   - Do not apply directly to water, or to areas where surface water is present or to manure management systems, fish habitats, or areas frequented by wildlife, except as directed on the label.

10. Harmful if absorbed through the skin.  
    - Causes moderate eye irritation.  
    - Avoid contact with eyes, skin, or clothing.  
    - Prolonged or frequently repeated skin contact may cause irritation.

11. This pesticide is toxic to aquatic life with long-term exposure.  
    - Avoid dispersal on or near water.  
    - Do not apply directly to water, or to areas where surface water is present or to manure management systems, fish habitats, or areas frequented by wildlife, except as directed on the label.

13. See safety data sheet, label, or doctor for additional information on this pesticide.
ClariFly®

**LIVESTOCK PREMIX 0.04%**

A PREGNANT CONTAINING DIFLUBENZURON INSECT GROWTH REGULATOR

For use on pregnant cows to control the population of gravid or non-gravid horn flies (Haematobia irritans irritans) for up to 45 days. This product is not for use on pregnant mares, pregnant ewes, or pregnant or lactating goats.

**CAUTION**

- Do not use on feedlot cattle. - Use only on pregnant cows.

**PRECAUTIONARY STATEMENTS - HAZARDS TO HUMAN HEALTH**

- Do not inhale dust. - Avoid skin contact. - Wash hands after use.

**PRECAUTIONARY STATEMENTS - HAZARDS TO ENVIRONMENT**

- Do not apply to or near fishable waters. - Apply only as directed.

**DIRECTIONS FOR USE**

- Apply 1.5 lbs of this product per ton of dry ration.

**EVALUATION**

- Weekly or more frequent evaluations are recommended. - Look for gravid horn flies on your cow.

**DISCLAIMER OF WARRANTIES**

Wellmark International makes no express or implied warranties, including fitness for a particular purpose, of this product. Authorized users shall assume all risk and liability whatsoever incident to the use, handling or application of this product.

**CONDITIONS OF WARRANTY AND LIMITATION OF LIABILITY**

Wellmark International will not be liable for any consequences of any action taken or not taken by user or other persons. Some states do not allow disclaimer of implied warranties or limitations of liability, so the above disclaimers and limitations may not apply to you.

**INTEGRATED PEST MANAGEMENT**

**PLANNING**

- Establish a threshold for action. - The number of horn flies on the cow's head is a good indicator of the need for treatment.

**IMPLEMENTATION**

- Four treatments a week, if needed, can control gravid horn flies for up to 45 days. - Apply the product on the cow's head daily, or when horn flies are observed. - Do not apply on feedlot cattle.

**EVALUATION**

- Evaluate daily. - If gravid horn flies are observed, apply the product as needed.

**DISCLAIMER OF WARRANTIES**

Wellmark International makes no express or implied warranties, including fitness for a particular purpose, of this product. Authorized users shall assume all risk and liability whatsoever incident to the use, handling or application of this product.
