**eFOG-170 DPA**

**Antisect Agent for Postharvest Treatment of Apples by Thermal Foggling**

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**Application Restrictions**

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Consult Agricultural Experiment Station or Extension Service pomology specialists for current recommended DPA application concentrations for local apple varieties.

**Preparation for Foggling**

- Make sure dry fm kit is removed from the field.
- Apply to fruit within 15 days after harvesting, prior to placing in storage.
- In case of prolonged storage (more than 4 months) or particularly high danger of scald due to climatological conditions, a second treatment is advisable between the second and third month of storage. This second treatment must be applied at a rate of between 50% and 100% of the initial dosage, depending on the importance of the danger and the length of further storage. A second treatment of 100% of the first dose is recommended for any additional storage of 3 months or longer.
- Before treatment, protect fruit in bins at the top of each stack with plastic liners, cardboard foggung paper sheets. Also protect fruit directly in the foggung of equipment with liners or sheets from top to bottom.
- When applying, follow instructions for category A on an EPA Chemical Resistance Selection Sheet. Equipment operators must wear:
  - Full-face respirator with organic vapor filter
  - Long-sleeved shirt and long pants
  - Protective eyewear (such as goggles, safety glasses, or a face shield)

**User Safety Requirements**

- Discard clothing or other absorbent materials that have been fogged or heavily contaminated with the product's concentrate. Do not reuse them.
- Follow manufacturer's instructions for cleaning and handling PPE. If no such instructions for equipment, use detergent and hot water. Keep and wash PPE separately.

**Environmental Hazards**

This pesticide is toxic to fish and aquatic invertebrates. Do not contaminate water by cleaning of equipment or disposing of equipment washwater or rinsate. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewage systems without prior notification to the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**Disclaimer**

Pace International, LLC (the Company) makes no representations or warranties express or implied, including but not limited to fitness for a particular purpose or merchantability, concerning this product. The user shall be responsible for the compliance with the requirements of all local and national laws and regulations. The user assumes full responsibility for the safe use, storage, and handling of this product and shall indemnify, defend, and hold harmless the Company, its employees, and agents from any claim or suit or proceeding arising out of, or in connection with this product or its use.

**StORAGE AND DISPOSAL**

- Do not contaminate water, food, or feed by storage or disposal.
- Avoid breathing dust, fumes, or mists. Avoid contact with skin or clothing.
- Avoid storing below 40º F. In case of spill or leak, absorb spill with sawdust, sand, or other absorbent material and then dispose of in appropriate manner.
- Information on product label is in accordance with the code of Federal Regulations (CFR) Title 40, Part 194. The Company disclaims any responsibility for changes in that code that may occur after the time of printing.
