WARNABILITY AND LIMITATION OF DAMAGES

To the extent consistent with applicable law, Suterra LLC warrants that this material conforms to the chemical description on the label and is reasonable for the uses stated in the Directions for Use. This warranty is the sole and exclusive warranty, and Suterra LLC does not authorize any agent or representative to make any other warranty of fitness or merchantability, or guarantee or representation, express or implied, concerning this material. To the extent consistent with applicable law, Suterra LLC’s maximum liability for breach of this warranty shall not exceed the purchase price of this product. To the extent consistent with applicable law, the buyer and user acknowledge and assume all risks and liabilities resulting from the handling, storage and use of this material contrary to label instructions.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed, absorbed through the skin, or inhaled. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing vapor. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse. Wear chemical resistant gloves and protective eyewear.

FIRST AID

IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a Poison Control Center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. If person is asthma or is breathing difficulty, call a Poison Control Center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor immediately for treatment advice. Have person hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor for treatment advice.

HOT LINE NUMBER: Have the product container or label with you when calling a Poison Control Center or doctor.

ENVIRONMENTAL HAZARDS

FOR TERRESTRIAL USES: Do not apply to water, or to areas where water surface is present or to intertidal areas below the high water mark.

For use on apples, pears, quinces, and other pome fruits; peaches, nectarines, plums, prunes, and other stone fruits; walnuts, pecans, and other tree nuts, the recommended rate of application of CheckMate CM-XL 2.0 Disperser is 120 to 200 dispensers per acre (300-500 dispensers per hectare). Do not apply more than 550 total dispensers per acre per year (150 g ai./ha./acre). 1370 total dispensers per hectare per year (370 g ai./ha./hectare).

Use gloves when handling dispensers. Provide adequate ventilation when handling dispensers. Do not handle dispensers or dispose of containers near livestock or food crops; avoid for secondary pests such as leafhoppers. 

Rehandle containers immediately after use. Do not use CheckMate CM-XL 2.0 Disperser from damaged, punctured or unsealed containers.

APPLICATION NOTES

For best results, apply at the time or shortly before cold moh or hickory shockworm moth begins to emerge in the spring (females), or when the moh are first detected in pheromone traps such as BioLure®. This product only affects adult male moh and will have no effect on female moh, eggs or larvae. If application occurs following floods or during the growing season, the orchard must be treated with insecticides that will effectively control hatching larvae until egg laying by previously mated female moh has ceased to occur. In moderate to high insect pressure situations, supplemental insecticide applications during the season may be necessary to provide adequate protection to developing fruit. These supplemental insecticide applications must be made based on trap monitoring, field scouting, and appropriate degree-day models for the local growing area, as required. If this product is used to control codling moth, it can be used with a non-generic insect repellent with trap modification and by visual inspection of trees and fruit. Reapply CheckMate CM-XL 2.0 Disperser as needed, based on monitoring results and field scouting.

STORAGE AND DISPOSAL

DO NOT contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store container in cool place until used. Reused containers immediately after use. Store unused product in a refrigerator or freezer not used for food storage.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved disposal facility.

CONTAINER DISPOSAL: Plastic Containers: Nonrefillable container. Do not reuse or refill this container. This product is inert or non-toxic. Then place in a trash or a reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned stay out of smoke. BioLure® Container: Nonrefillable, nonreusable container. Do not reuse or refill this container. Dispose of empty BioLure® Container as a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned stay out of smoke.
