**PARA-MOTH® INSECTICIDE**

**Active Ingredient:** Para-Dichlorobenzene 100%  
CAS: 106-46-7 Chemical Name: 1,4-Dichlorobenzene

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**WARNING**
- Causes substantial but temporary eye injury.  
- Harmful if swallowed or absorbed through skin.  
- Causes eye, skin, and respiratory tract irritation.  
- Wear goggles or face shield.  
- Do not get in eyes or on clothing.  
- Avoid contact with skin.  
- Wash thoroughly with soap and water after handling.  
- Remove contaminated clothing and wash before reuse.

**Personal Protective Equipment:** All applicators and other handlers must wear: long sleeved shirt, long pants, shoes plus socks.

*NOTICE: California has determined that a chemical contained in this product causes cancer based on its tests performed in laboratory animals.*

**ENVIRONMENTAL HAZARD**

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this active ingredient into bodies of water. Disposal of this product in drains and sewers is not permitted. Disposal may be hazardous. Improper disposal of this product may be hazardous. Improper disposal of this product may be hazardous. Improper disposal of this product may be hazardous.

**ENVIRONMENTAL HAZARD**

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this active ingredient into bodies of water. Disposal of this product in drains and sewers is not permitted. Disposal may be hazardous. Improper disposal of this product may be hazardous. Improper disposal of this product may be hazardous. Improper disposal of this product may be hazardous.

**PHYSICAL OR CHEMICAL HAZARD**

Vapor concentration of Para-Dichlorobenzene greater than 50 ppm has been reported to cause irritation to skin, eyes and throat in humans. Repeated excessive exposure can cause liver and kidney damage.

**DIRECTIONS FOR USE**

- For the control of moths in beehives and bee housings. See side panel text under the heading WAX MOTH CONTROL DIRECTIONS for instructions in the use of this product.

**DIRECTIONS FOR USE:** To be used for empty extracted combs when in storage.

**CAUTION:** DO NOT USE FOR COMB HONEY, CUT COMB HONEY OR COMBS OF HONEY THAT HAVE NOT BEEN EXTRACTED.

**ASK FOR AND REVIEW MATERIAL SAFETY DATA SHEET (MSDS) FOR DETAILED SAFETY, HEALTH EFFECTS, SPILL AND DISPOSAL INFORMATION.**

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

**PESTICIDE STORAGE:**
- Keep away from heat and flames. Store in a cool dry area under lock and key. Post as a pesticide storage area. Always store pesticides in the original container. Store away from food, pet food, feed, seed, fertilizers, and veterinary supplies. Place liquid formulations on lower shelves and dry formulations above.

**PESTICIDE DISPOSAL:**

Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

**CONTAINER HANDLING:**

Nonrefillable container. Do not reuse or refill this container.

**NOTE TO PHYSICIAN**

Never administer epinephrine for overdose or over exposure. Increased sensitivity of the heart may occur.

**NET WT.** 16 oz. 1 lbs. 454g

**WAX MOTH CONTROL DIRECTIONS**

Treatment with Para-Dichlorobenzene requires no special storage facilities. The supers should be stacked as tightly as possible. Special precautions should be taken to see that the gas is heavier than air, cannot escape at the bottom of the stack. This can be accomplished by laying several layers of newspaper down prior to stacking the supers. For long periods of storage, as over winter, the crickle between supers should be covered with strips of tape. No more than 5 full-depth supers or 10 half-depth supers should be used in a stack.

Taller stacks may not allow for the complete diffusion of the heavy gas, especially during periods of low temperature. In each stack of supers, 3 oz. of crystals (6 tablespoons) should be placed on the top bars, preferably, separated from the frames by a piece of paper or cardboard. The cover should then be put tightly in place. At intervals of 2 or 3 weeks the covers of the stacks should be raised and the top supers examined; if the crystals are no longer present, more should be added. Para-Dichlorobenzene kills adults and immature stages, but not eggs. The continuous presence of crystals within the stack not only repels moths, but also kills any young larvae that hatch after the combs are placed in storage.

Stored combs that have been treated must be thoroughly aired first, otherwise bees will be killed.
