Class Act® NG®

By WinFIELD

Water Conditioning Agent/
Nonionic Surfactant Blend

PRINCIPAL FUNCTIONING AGENTS:
Ammonium sulfate, corn syrup, alkyl polyglucoside ....................... 50.5%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANTS ....................... 49.5%
TOTAL .................................................................................................... 100.0%

Surfactant content 10% (note the user rate of 2.5% v/v compensates for the low surfactant %)
All ingredients are exempt from the requirements of a tolerance in 40 CFR 180.

Protected by U.S. Patent Nos. 5,945,377 and RE 36,149

KEEP OUT OF REACH OF CHILDREN
WARNING
Causes eye irritation.

NET CONTENTS: 2.5 GAL (9.46L)

PRECAUTIONARY STATEMENTS
Wash hands thoroughly after handling.

STORAGE AND DISPOSAL
Keep product in original container. Do not contaminate water, food, or feed by storage or disposal. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. Contact your state and local ACRC recycler or visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

FIRST AID
IF IN EYES: Rinse cautiously with water for 15 minutes. Remove contact lenses if present and easy to do so. Continue rinsing. If eye irritation persists get medical attention.

FOR EMERGENCY, SPILL, LEAK, FIRE, EXPOSURE, OR ACCIDENT, CALL: CHEMTREC 1-800-424-9300

GENERAL INFORMATION
CLASS ACT® NG®, a water conditioning agent (Ammonium Sulfate)/Nonionic Surfactant Blend, is a low foam formula for use with pesticides that are labeled for agricultural, aquatic, forestry, non-cropland, and right-of-way uses. CLASS ACT® NG® is formulated to meet the surfactant and ammonium sulfate recommendation for many glyphosate, glufosinate, paraquat, and diquat products or other herbicides requiring the addition of nonionic surfactant and ammonium sulfate. CLASS ACT® NG® reduces potential antagonism and improves uptake of most nutrients in foliar applications. This patented formulation contains 1.3 pounds of sugar per gallon.

Approved for Aquatic Use With Pesticides Labeled for Aquatic Use.

DIRECTIONS FOR USE
Shake Well Before Using

CLASS ACT® NG® may be used at a rate of 2.5-5.0% v/v (2.5-5.0 gallons per 100 gallons of spray solution). This meets Roundup® Original, Cornerstone® and similar product label requirements for 0.5-1.0% v/v nonionic surfactant plus 8.5-17 pounds of dry ammonium sulfate per 100 gallons of water. Follow herbicide label for specific rates, mixing instructions and other precautionary instructions. Do not mix CLASS ACT® NG® with INTERLOCK® in an induction system or container when both products are undiluted. Once mixed in water, both products are compatible in either mixing order.

Amounts of nonionic surfactant and dry ammonium sulfate in CLASS ACT® NG®.
