TRICHLOR 1” TABLETS

Slow Dissolving • Concentrated • Stabilized

ACTIVE INGREDIENT
Trichlor-s-triazinetrione ............. 98.6%
OTHER INGREDIENTS ................. 1.4%
TOTAL: .................................. 100.0%
Available Chlorine 90%

Stabilized Chlorinating Tablets for Feeders and Floaters

KEEP OUT OF REACH OF CHILDREN
DANGER

FIRST AID: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call poison control center or doctor for treatment advice.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER.
CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Do not breathe dust, vapor or smoke. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not contaminate water by careless disposal or disposal or waste. Do not discharge effluent containing this product into lakes, streams, ponds, harbors, coastal areas or other waterways unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent; DO NOT mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean, dry containers. Do not add this product to any dispensing device containing remnants of any other product. Each use may cause a violent reaction leading to fire or explosion. Contact with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposiation, do not reseal container. If possible, isolate container in open air, well ventilated area. Flood area with large volumes of water.

SWIMMING POOL DISINFECTANT
This product, when used as directed, is effective as a swimming pool water disinfectant.

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and use directions.

SUPERCHLORINATION
Superchlorination is necessary at the beginning of the swimming season, whenever the pool is filled, every week during hot weather, and following heavy rain or windstorms. Superchlorinate the pool with a suitable granular product by following directions on that product's label. Keep pump-filer system running for at least 10 hours after treatment. Frequency of treatment is dependent on ambient temperatures and weather load. DO NOT re-enter pool until the chlorine residual has dropped to 1.0 – 3.0 ppm.

MAINTENANCE TREATMENT
Ensure all pool equipment and systems are in proper working condition, and that the water is balanced. When using other products as outlined in directions for these products, always follow directions on those products. Adjust and maintain pool water pH in the range of 7.2-7.6 as indicated by a suitable test kit. Superchlorinate the pool with a suitable granular product to establish a free available chlorine residual of 1.0 – 3.0 ppm. For maximum effectiveness, it is recommended that the pool be first stabilized with 25-30 ppm of Cyanuric Acid to reduce chlorine loss in summer pools. This product introduces chlorine and additional Cyanuric Acid into the pool to assure a stabilizing effect.

APPLICATION: Dispense these tablets in an appropriate floating or stationary feeding device, such as an automatic chlorinator. Fill the feeder with this product and adjust the feeding mechanism to provide a continuous level of 1.0 – 3.0 ppm free available chlorine in the pool as determined by a test kit or test strips. Always follow feeder manufacturer's instructions. Chlorine demand will vary with weather and degree of pool use, but, normally about 2 ounces of this product per 10,000 gallons of water will be needed daily. The feeding device should be cleaned regularly and refilled as needed. Caution: This product may cause damage to vinyl liners or other bleachable surfaces with direct contact.

REENTRY NOTE: TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE DUE TO RISK OF BODILY INJURY.

STORAGE AND DISPOSAL:
Do not contaminate water, food or feed by storage or disposal.
STORAGE: Do not contaminate water, food or feed by storage or disposal. Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep out of reach of children. In case of spillage, wash with large amounts of water. After each use, keep container tightly closed. Oxidizing material. Keep away from flames, sparks and all sources of heat. Avoid contact with organic material.

DISPOSAL: If spills: Nonrefrangible container. Do not reuse or refill this container. Offer for recycling if available. If properly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
