CHIPCO TRITON 70 WDG FUNGICIDE controls the diseases listed below.

**Conditions for severe disease or for an early curative application**

- Use the higher rate and shorter interval.
- Tank mix with Tartan™ or 26 GT fungicide.
- Continue under active disease conditions as advised by local recommendations.
- Under periods of high rainfall when conditions are favorable for development.
- Make 1-2 applications, repeating at a 14-28 day interval.

**Begin fungicide applications preventively**

- Under preventive application conditions or prior history for severe disease.
- Under conditions for severe disease or for an early curative application.
- Use the lower rate and longer interval.
- Move fungicide into the root zone.

**Algae**

Use preventively the lower rate for the suppression of algae. Continue as needed, on a 14-28 day interval.

**Large Patch**

Rhizoctonia solani

Use preventively in late fall. Make 1-2 applications, repeating at a 14-28 day interval.

**Red Thread**

Laetisaria nivale and roseipellis

Begin fungicide applications preventively in the fall.

**Pink Snow Mold**

Under conditions for severe disease or for an early curative application.

**Gray Leaf Spot**

Ophiosphaerella korrae

Begin fungicide applications preventively in the fall. Make 1-2 applications, repeating at a 14-28 day interval.

**Red Leaf Spot and Necrotic Ring Spot**

**Bipolaris**

**Typhula Blight**

**Disease Control**

**CONDITIONS:**

The directions for use of this product are believed to be adequate and must be followed. Use only as directed. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties, and Limitations of Liability.

**INDICATIONS:**

CHIPCO TRITON 70 WDG FUNGICIDE at 0.60 ounce per 1000 sq ft.

CHIPCO TRITON 70 WDG FUNGICIDE is supplied in a ready-to-spray concentrate. Do not mix or dilute except as specified in the product label. Do not use for applications on turf in public parks, recreation areas, cemeteries and sports fields.
SWALLOWED:

IF IN EYES:

• Immediately call a poison control center or doctor for treatment advice.
• Move person to fresh air.
• Call a poison control center or doctor for treatment advice.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled:

• Remove person to fresh air.
• Call a doctor immediately. See first-aid treatment above.

If on skin:

• Wash contaminated clothing before reuse.
• Wash hands immediately after handling.

• For prompt and effective relief of irritation caused by exposure,
  avoid further irritation by removing contaminated clothing
  and washing the skin immediately with soap and water.
• Apply a cool wet compress for 15 minutes.

If on clothes:

• Wash clothing separately from other laundry.
• Use cool water.
• Wash and dry thoroughly before wearing again.
• Do not reuse until washed and dried.

If ingested:

• Do not induce vomiting.
• Do not give anything by mouth to an unconscious person.

For PRODUCT

TECHNICAL

CHIPCO TRITON 70 WDG FUNGICIDE is a broad spectrum fungicide with preventive, systemic, and postinfectional action. It is effective against turf diseases and is designed for use on a variety of turf types. The active ingredient is triticonazole, a sterol-inhibiting fungicide that inhibits the synthesis of fungal membranes.

DIRECTIONS FOR USE

TURF-SPECIFIC USE DIRECTIONS

For golf courses only:

• Apply more than 1.8 oz of CHIPCO TRITON 70 WDG FUNGICIDE per 1,000 sq ft (3.45 L/1,000 sq ft). Follow the label instructions for repeat application intervals.

• Do not apply to turf cut higher than 1” on golf holes where water is restricted by state law. Use turfgrass species that are resistant to turf quality impact, and reduce turf growth, particularly during periods of heat stress and high moisture.

• Under conditions for severe weather/Yellow patch, apply 0.15-0.6 lb ai/A per year. Follow the label instructions for repeat application intervals.

• Use CHIPCO TRITON 70 WDG FUNGICIDE as a sequential treatment with other fungicides to control turf diseases.

• Do not use in a tank mixture with other pesticides or products, including but not limited to herbicides, insecticides, growth regulators, and foliar nutrients.

• The turf safety of all potential tank-mixes with CHIPCO TRITON 70 WDG FUNGICIDE has not been tested on all turf type variants. Before applying any tank-mixture not specifically recommended on this label, safety to the target turf should be evaluated. For example, consider the compatibility of CHIPCO TRITON 70 WDG FUNGICIDE with various fertilizer products.

• Combinations of CHIPCO TRITON 70 WDG FUNGICIDE at high labeled rates with PG Rs may have an impact turf quality and reduce turf growth, particularly during periods of heat stress and high moisture.

• Chipco TRITON 70 WDG FUNGICIDE is suggested for resistance management under conditions for severe turf disease pressure.

• Under preventive applications, apply fungicide according to the recommended treatment interval. Begin fungicide applications preventively in the fall, followed by a second application 3-6 weeks later. Use the lower rate and longer interval.

• Under conditions for severe turf disease pressure, begin fungicide applications preventively in the fall. Use the lower rate and longer interval. Late curative applications will provide effective control of turf diseases.

• DO NOT overwater treated areas or apply to turf that is under excessive stress in the summer. DO NOT allow spray mixture to remain impacted water when disposing of equipment wash water. Drift or runoff may be hazardous to aquatic life.

• DO NOT mix CHIPCO TRITON 70 WDG FUNGICIDE with any pesticide, herbicide, insecticide, growth regulator, or foliar nutrient product. However, the physical compatibility of CHIPCO TRITON 70 WDG FUNGICIDE with all potential tank-mix partners has not been tested. For each potential tank-mixture, use a small jar test with the volumes and rates typically used in an agricultural application. If the test indicates physical compatibility, proceed with the tank-mix. Use an agitator or sprayer to mix CHIPCO TRITON 70 WDG FUNGICIDE with water-soluble packaging (wait for it to completely dissolve), wettable powders, and water-concentrates last. Maintain agitation throughout spraying. DO NOT allow spray mixture to remain impacted water when disposing of equipment wash water. Drift or runoff may be hazardous to aquatic life.

• DO NOT enter or allow worker entry into treated areas during the restricted entry interval because the product is hazardous to the respiratory system of humans.

• DO NOT use on ultradwarf bermudagrass varieties. DO NOT use on bermudagrass varieties when 5-day average daily soil temperatures taken at 2 inches are 55-65°F. DO NOT use on bermudagrass varieties when 5-day average daily air temperatures can be less than 32°F. DO NOT use on bermudagrass varieties when 5-day average daily air temperatures can be less than 32°F.

• For golf courses only, apply more than 1.8 oz of CHIPCO TRITON 70 WDG FUNGICIDE per 1,000 sq ft (3.45 L/1,000 sq ft). Follow the label instructions for repeat application intervals.

• Use CHIPCO TRITON 70 WDG FUNGICIDE as a sequential treatment with other fungicides to control turf diseases.

• DO NOT mix CHIPCO TRITON 70 WDG FUNGICIDE with any pesticide, herbicide, insecticide, growth regulator, or foliar nutrient product. However, the physical compatibility of CHIPCO TRITON 70 WDG FUNGICIDE with all potential tank-mix partners has not been tested. For each potential tank-mixture, use a small jar test with the volumes and rates typically used in an agricultural application. If the test indicates physical compatibility, proceed with the tank-mix. Use an agitator or sprayer to mix CHIPCO TRITON 70 WDG FUNGICIDE with water-soluble packaging (wait for it to completely dissolve), wettable powders, and water-concentrates last. Maintain agitation throughout spraying. DO NOT allow spray mixture to remain impacted water when disposing of equipment wash water. Drift or runoff may be hazardous to aquatic life.

• DO NOT enter or allow worker entry into treated areas during the restricted entry interval because the product is hazardous to the respiratory system of humans.

• DO NOT use on ultradwarf bermudagrass varieties. DO NOT use on bermudagrass varieties when 5-day average daily soil temperatures taken at 2 inches are 55-65°F. DO NOT use on bermudagrass varieties when 5-day average daily air temperatures can be less than 32°F. DO NOT use on bermudagrass varieties when 5-day average daily air temperatures can be less than 32°F.
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

or clothing. Wash thoroughly with soap and water after handling and before eating, drinking.

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

OR CLOTHING:

Have the product container or label with you when calling a poison control center or emergency assistance. It also contains specific instructions and exceptions pertaining to chemical-resistant gloves made out of any waterproof material, and shoes plus socks. (PPE). If there are no such instructions for washables, use detergent and hot water. Keep and store properly out of reach of children and pets.

Chipco TRITON 70 WDG Fungicide, when used in conjunction with best turfgrass management practices, may be used on all commercial, institutional and residential turf. The use of turf fertility and disease control chemical-resistant gloves made out of any waterproof material, and shoes plus socks. (PPE). If there are no such instructions for washables, use detergent and hot water. Keep and store properly out of reach of children and pets.

The requirements in this box apply to uses of this product that are NOT within the scope of agricultural use. Under conditions for severe disease or for an early curative treatment, this fungicide is suggested for resistance management. Application rates and interval should be increased under conditions for severe disease or for an early curative treatment. The second application should be made 28 days after the first application. The second application should be made at the earliest, irrigation should occur that night.

BUFFALOGRASS:

Anthracnose, Brown Patch (W. graminea), Fusarium Patch (Fusarium solani), fairy ring (Marasmius oreades), and Rhizoctonia stem rot (Rhizoctonia solani) are all common turf grass diseases. Chipco TRITON 70 WDG Fungicide can be used on all commercial, institutional and residential turf.

CONCENTRATES:

Chipco TRITON 70 WDG Fungicide can be used on all commercial, institutional and residential turf. The use of turf fertility and disease control chemical-resistant gloves made out of any waterproof material, and shoes plus socks. (PPE). If there are no such instructions for washables, use detergent and hot water. Keep and store properly out of reach of children and pets.

PREVENTIVE USES:

For preventive applications, the fungicide beneath the thatch. Rates and interval should be increased under conditions for severe disease or for an early curative treatment. The second application should be made 28 days after the first application. The second application should be made at the earliest, irrigation should occur that night.

For turf quality:

The use of turf fertility and disease control chemical-resistant gloves made out of any waterproof material, and shoes plus socks. (PPE). If there are no such instructions for washables, use detergent and hot water. Keep and store properly out of reach of children and pets.

chipco TRITON 70 WDG Fungicide can be used on all commercial, institutional and residential turf. For Medical Emergencies Call 24 Hours A Day 1-800-334-7577.

- Call a poison control center or doctor for further treatment advice.
- Call a poison control center or doctor for treatment advice.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Take off contaminated clothing.
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.

For PRODUCT

- Inform ation Call 1-800-331-2867
- Do not apply this product in a way that will contact workers or other persons, either directly or to aquatic invertebrates in neighboring areas.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

User Safety Recommendations

- Avoid the shorter application intervals if the turf is under excessive stress in the summer.
- Turfgrass Species:
  - Fine and Tall Fescue
  - St. Augustinegrass
  - Centipedegrass
  - Buffalo grass
  - Fine fescues
  - Kentucky Blue grass
  - Ryegrass
  - Perennial ryegrass
  - Kentucky Blue grass
  - Bent grass
  - Zoysia
  - Hybrid bent grass
  - Bent grass

TURF-SPECIFIC USE DIRECTIONS

- Chipco TRITON 70 WDG Fungicide may be used alone to control important diseases of turfgrass disease control and turf quality.
- Chipco TRITON 70 WDG Fungicide is a systemic fungicide which moves from sprayed leaves into the plant interior, resulting in control of foliar disease and root and rhizome blight.
- Chipco TRITON 70 WDG is a dependable and reliable solution for turfgrass disease management.

Applications

- To limit the potential for development of disease resistance to this fungicide class do not make more than 3 sequential applications of Chipco TRITON 70 WDG Fungicide or any other fungicide that contains chlorothalonil.

Turfgrass Species

- Bermuda grass (Bermuda grass)
- Zoysia grass
- St. Augustinegrass
- Centipedegrass
- Kentucky Blue grass
- Bent grass
- Perennial ryegrass
- Hybrid bent grass
- Zoysia grass

Spray Mixing and Compatibility

- In general, begin with clean spray equipment and add one-half of the required quantity of water a jar test with the volumes and rates typically used in agricultural application. Using a small water-dispersible granular products first, then liquid flowables and emulsifiable concentrates globules, sludge, flakes, or other precipitates. Physical compatibility is indicated if the compound

Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and entry intervals. The requirements in this box only apply to uses of this product that are not within the scope of the immediately adjacent box.

Pesticide Storage

- Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available.
- Keep out of reach of children and pets.
- Keep container sealed at all times.
- Do not apply this product on food crops or food contact surfaces.

Emergency Assistance

- It also contains specific instructions and exceptions pertaining to the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and entry intervals. The requirements in this box apply to uses of this product that are not within the scope of the immediately adjacent box.

贮存和处置

- 非可充填容器。禁止重新使用或充填此容器。提供回收利用，如条件许可。
- 请置于儿童和宠物不可触及之处。
- 请保持容器始终密封。
- 请勿将此产品施用在食物作物或食品接触表面上。

用户安全建议

- 避免在高温下施用此产品。
- 避免在日光直射下施用此产品。
- 避免在水体附近施用此产品。

产品使用说明

- Chipco TRITON 70 WDG Fungicide may be used alone to control important diseases of turfgrass disease control and turf quality.
- Chipco TRITON 70 WDG Fungicide is a systemic fungicide which moves from sprayed leaves into the plant interior, resulting in control of foliar disease and root and rhizome blight.
- Chipco TRITON 70 WDG is a dependable and reliable solution for turfgrass disease management.

应用

- 为防止此类杀菌剂类产生抗药性，每种杀菌剂的连续施用不应超过三次。
- 对于在同一区域内施用多种杀菌剂的情况，应根据杀菌剂的特性选择最有效的杀菌剂。

CHIPCO TRITON 70 W DG FUNGICIDE controls the diseases listed below.

- Gray Leaf Spot
- Leaf Spots, including 
  - Necrotic Ring Spot
- Dreschlera spp.

Use Information

- Use the higher rate and shorter interval where light disease pressure is needed, on a 14-28 day interval. Use the lower rate and longer interval under conditions for severe disease or for an early curative application.
- Under conditions or prior history for severe disease, use the higher rate and tank mix with 1 gallon of water per 1000 sq ft.
- Under conditions for severe disease, use the lower rate and longer interval.
- Use the higher rate and shorter interval under conditions favorable for disease development.
- Use the lower rate and longer interval.
- Always use the rate specified on the label.
- Use the lower rate and longer interval where light disease pressure is present.
- Under active disease conditions, repeat the application as needed, on a 14-28 day interval.

TURF-SPECIFIC USE DIRECTIONS 1

- Under conditions or prior history for severe disease or for an early curative application, use the lower rate and longer interval.
- Under conditions for severe disease, use the higher rate and shorter interval.
- Use the lower rate and longer interval when night air temperatures reach 60˚ F to 70˚ F.
- Use the higher rate and tank mix with 1 gallon of water per 1000 sq ft.

TARTAN OR 26 GT FUNGICIDE

- Under conditions or prior history for severe disease or for an early curative application, use the lower rate and longer interval.
- Under conditions for severe disease, use the higher rate and shorter interval.
- Use the lower rate and longer interval.
- Use the higher rate and shorter interval where light disease pressure is needed, on a 14-28 day interval.
- Use the lower rate and longer interval where light disease pressure is present.

CHIPCO TRITON 70 WDG FUNGICIDE at 0.30 ounce per 1000 sq ft.
CAUTION

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes.

SWALLOWED:

• Do not induce vomiting unless told to do so by a poison control center or doctor for further treatment advice.
• Call a poison control center or doctor for further treatment advice.
• Move person to fresh air.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.

ENVIRONMENTAL HAZARDS

Do not apply this product in a way that will contact workers or other persons, either directly or through runoff. Do not allow contact with soil near water courses or ditches. In commissaries and markets, do not apply this product where it may come in contact with food or articles that contact food. Keep and store in original container, out of the reach of children, pets, and livestock. Do not contaminate water, food, or feed by storage or disposal. Do not apply when weather conditions are likely to result in drift or runoff that may be hazardous to persons or property. Do not use near any body of water or when moisture is present.

For MEDICAL:

• Offer for reconditioning, if appropriate. Triple rinse container (or equivalent) promptly after use. Keep and store in original container. If not using, cover with a plastic or metal lid. Do not use this product where it may come in contact with food or articles that contact food. Do not contaminate water, food, or feed by storage or disposal. Do not apply when weather conditions are likely to result in drift or runoff that may be hazardous to persons or property. Do not use near any body of water or when moisture is present.

APPLICATION INSTRUCTIONS

Chipco TRITON Fungicide may be used alone to control important diseases of turfgrass. Disease control is optimal when Chipco TRITON Fungicide is applied in a preventive, systemic, preventative and scheduled spray program and used in rotation with other fungicides. When used according to the label instructions, Chipco TRITON Fungicide will control the diseases listed under Turf-Specific Use Directions.

In general, begin with clean spray equipment and add one-half of the required quantity of water and complete filling with water and surfactant. Maintain agitation throughout spraying. Do not allow spray mixture to remain in the spray equipment more than 12 hours. Do not mix with petroleum-based surfactants, other pesticides, fertilizers, or other chemicals. Use a small jar test with the volumes and rates typically used in agricultural application. Using a small jar test, mix or remix readily. Do not mix or remix with other pesticides.

RECOMMENDED USES

CHIPCO TRITON Fungicide is a broad spectrum fungicide with preventive, systemic, preventative and scheduled spray program and used in rotation with other fungicides. In general, begin with clean spray equipment and add one-half of the required quantity of water and complete filling with water and surfactant. Maintain agitation throughout spraying. Do not allow spray mixture to remain in the spray equipment more than 12 hours. Do not mix with petroleum-based surfactants, other pesticides, fertilizers, or other chemicals. Use a small jar test with the volumes and rates typically used in agricultural application. Using a small jar test, mix or remix readily. Do not mix or remix with other pesticides.
