Rose & Flower

DESCRIPTION

Gardner & Bloome Rose & Flower Insect Spray works on Pheromone-driven insects by disrupting the Octopamine neuro-receptors of these pests. It is non-systemic and can be used for outside applications without danger to humans, pets, wildlife, livestock or fish. It can also be used for inside applications without stain or damaging residue. This advanced formulation is derived from oil of Juniper virginiana and is safe and effective against a broad spectrum of nuisance insects without the use of toxic chemicals.

Controls these listed insects and others: Assorted Beetles, Armyworms, Cutworms, European Corn Borers, Tarnished Plant Bugs, Leaf Hoppers, Grasshoppers, Harlequin Bugs, Cinch Bugs, Stink Bugs, Leaf Miners, Leaf Rollers, Whitefly, Tomato Worms, Mealy Bugs, Apple Aphids, Apple Maggots, Bagworms, Tent Caterpillars, Gypsy Moths, Japanese Beetles, Codling Moths, Cucumber Beetles, Peach Tree Borers, Plum Curculios (gouger), Citrus Cutworms, Orange Tortrix, and Scale. Works on biting sucking and rasping insects.

HOW THIS PRODUCT WORKS

The aroma of cedar oil is lethal to NON-BENEFICIAL insects which are driven by pheromone (odor) and heat stimuli. Cedar oil stifles the ability of the insects' receptors to detect food, mates, and disrupts its reproduction habitats. When comfort levels are destroyed, insects become overwhelmed and relocate to areas of concentration where sight-driven predators such as birds, lizards, and beneficial insects will control infestations. Insect displacement interrupts the "egg laying cycle" eliminating a new generation of arthropod. Continued use of this product will create a barrier of re-entry, leaving a pest-free landscape. This product is compatible with most fertilizers.

HOW TO USE THIS PRODUCT

Shake well before using or sampling. Start spraying when insects or damage first appears. Spray thoroughly, covering both sides of leaves, stems and branches. Repeat application in 7-10 days as necessary. For best results use as a repellent spray. **DO NOT SPRAY ON A WINDY DAY.**

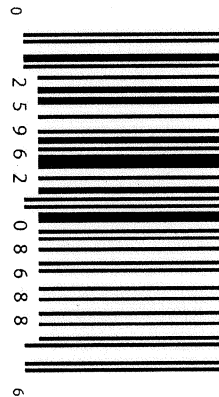

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop and soil conditions may vary, Kellogg Garden Products and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use and handling, whether or not in accordance with directions or suggestions.

STORAGE AND DISPOSAL

Storage: Store in a dry place. Avoid prolonged exposure to direct sunlight. Tightly reseal after opening to preserve shelf life.

Disposal: When container is empty—rinse and place in trash or recycling container.

Caution: Avoid contact with eyes. When applying, use protective eye wear and gloves. In case of eye contact, flush with water for 15 minutes. Do not take internally. After use, wash hands with soap and water. Concentration of over 1% may cause phytotoxic burns in some plant life if applied in temperatures over 90°F. **DO NOT SPRAY ON A WINDY DAY.**
