SCRIMMAGE™

NONIONIC AND ORGANOSILICONE SURFACTANT BLEND

PRINCIPAL FUNCTIONING AGENTS

Alkylphenol ethoxylate, polyether-polymethylsiloxane copolymer, propylene glycol	99.8%
Constituents ineffective as spray adjuvants	0.2%
TOTAL	100%

CA Reg. No. 52467-50023-AA / WA Reg. No. 52467-12001

KEEP OUT OF REACH OF CHILDREN WARNING

PRECAUTIONARY STATEMENTS

May be harmful if swallowed. May be harmful in contact with skin. May cause an allergic skin reaction. Causes eye irritation. Keep out of reach of children. Read label before use. Keep container tightly closed. Keep only in original container. Avoid breathing dust/fume/gas/mist/vapors/spray. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Contaminated work clothing should not be allowed out of the work place.

Personal Protective Equipment: Wear protective gloves/protective clothing/eye protection/face protection.

Environmental Hazards: Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

FIRST AID

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present, after the first 5 minutes, then continue cautiously rinsing eye. Have the product container with you when calling a poison control center or doctor, or going for treatment. If eye irritation persists: Get medical advice/attention.

IF ON SKIN OR CLOTHING: Take off contaminated clothing and wash it before reuse. Wash skin with soap and water. Call a poison center, doctor, chemical manufacturer, importer, or distributor to specify the appropriate source of emergency medical advice. If skin irritation occurs: Get medical advice/attention.

IF SWALLOWED: Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Do not give anything by mouth to an unconscious person. Immediately call a poison center, doctor, chemical manufacturer, importer, or distributor to specify the appropriate source of emergency medical advice.

IF INHALED: If breathing is difficult, remove person to fresh air and keep at rest in a comfortable position for breathing. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth to mouth if possible.

NET CONTENTS: 1 U.S. GALLON (3.79 L)

GENERAL INFORMATION

SCRIMMAGE™ is a superior quality, general purpose nonionic and organosilicone surfactant blend that can be used with most insecticides, fungicides, herbicides and wettable powders. **SCRIMMAGE™** improves performance of the active spray ingredients by giving them more uniform distribution and better wetting of the target surface.

- Includes silicone surfactant which provides improved performance at lower use rates than other surfactants
- Low surface tension allows spray droplets to spread further upon contact than other surfactants
 - Increased contact area drives pesticide actives into the plant faster
 - Penetrates hydrophobic surfaces, aiding the delivery of actives

Ideal For:

- Use with pesticides in horticulture, nursery, turf and pest control applications
- Improving rapid uptake of actives
- Increasing the rainfastness of pesticides
- Spreading spray solutions across maximum coverage area

DIRECTIONS FOR USE

NOT FOR AQUATIC USE

NOTICE: Pesticide manufacturers routinely detail adjuvant use guidelines on the pesticide label. The manufacturer's guidelines take priority over any directions or suggestions provided on the **SCRIMMAGE™** label. The following guidelines are not intended to supersede or displace pesticide label instructions, but should be used as general use recommendations when or if pesticide labels do not provide specific instructions. Adjuvant terminology does vary among pesticide and other manufacturer labels – all references to NIS, nonionic surfactant, spreaders, wetters, spreader-wetters, and/or organosilicone surfactant are all commonly used terms that refer to the use of a surfactant adjuvant such as **SCRIMMAGE™**. **SCRIMMAGE™** is allowed if the pesticide label allows the use of any of the products described above and if an organosilicone surfactant is not prohibited.

MIXING INSTRUCTIONS

As with all spray applications, be certain that the spray tank is clean and free from previous spray before following these mixing instructions.

1. Fill tank 2/3 to 3/4 full of water and initiate tank agitation systems. If foaming is anticipated, add an antifoam agent, such as REVERSE™, at this time to prevent and manage foaming problems during the mixing process.

2. Add pesticide/nutritional actives as directed by those respective label(s). Continue agitation.
3. Add the required dosage of **SCRIMMAGE™** (refer to the dose chart below). Mix for 1 to 2 minutes with minimal agitation.
4. Continuing lower than normal agitation, fill the tank with water. For best results, apply within 36 hours of mixing, continuing minimal agitation throughout the spray process.

USE RATES

Active Ingredient

Per 100 gallons of solution

Insecticides, Miticides & Fungicides	6-32 fl. oz.
Herbicides, Defoliants & Desiccants	12-64 fl. oz.
Glyphosates without other surfactants	12-64 fl. oz.
Fertilizers & Micronutrients	4-32 fl. oz.

The general application concentration rates suggested on this label are based on pesticide and nutritional input labels that recommend the use of a nonionic surfactant such as **SCRIMMAGE™**. Rates of this product may be increased or decreased for optimum results. Follow the pesticide labeling for specific recommendations. **SCRIMMAGE™** can be used where a nonionic surfactant may not be specifically recommended. The user or applicator advisor must have experience with the combination or must have conducted a phytotoxicity trial to insure suitability for use. This product is not allowed for use if the pesticide/nutritional labels specifically prohibit the use of nonionic or organosilicone surfactant adjuvants.

STORAGE AND DISPOSAL

Storage: Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F.

Disposal: Do not contaminate water, food or feed by storage or disposal. Dispose of contents / container to an approved waste disposal facility in accordance with all federal, state and local regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.
