

PURE *GreenThumb*

DIRECTIONS FOR USE:

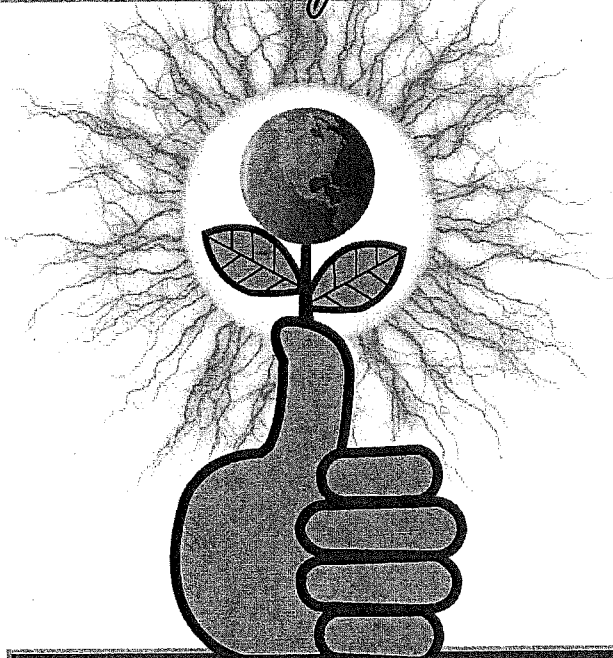

Green Thumb may be sprayed on foliage to combat mites, thrips, aphids, white flies, eggs including mites along with molds, mildew and most leaf dwelling insects. It is safe to use up until the day of harvest. For best results rinse with water in between uses. Allow Green Thumb 24 hours on the plant prior to rinse. Saturate the stem and the tops and bottoms of leaves starting at the bottom of the plant and working your way to the top. Green Thumb must be used between 38°F and 88°F. Use only as directed. Happy growing.

PH 6.4. We advise testing the PH of all ready-to-use products prior to use. Not for use on food crops. We suggest KAPOW in the late stages of flower and/or fruit.

Shake vigorously prior to application. Do not dilute. Ready to use.

Store in original container in a dry place inaccessible to children and pets. Do not reuse empty containers. Recycle or discard in trash.

25b Compliant

Clone and VEG. Spray

Net Wt. 1 Gallon (128 fl. oz.)

Active Ingredients:

Lemon Grass Oil 11.6%

Inactive Ingredients:

Fish Oil.....14.2%

Soap1.0%
(Neutralization of Fatty Acid)
