POWERED BY THE SCIENCE OF
Nature's Technology

WHERE TO USE
Use as a contact spray for controlling stinging pests in and around farm buildings such as barns, stables, milking parlours, dairies, calf houses, pigpens, poultry houses, warehouses, stores, lavatories, farm offices, farmhouses, slaughter houses and other associated areas where insect control is necessary. Product use permitted in other areas or facilities when product is used according to label directions.

DIRECTIONS FOR USE
Read entire label prior to use and use product as directed. Shake well before using.
NEST: For optimal results, applications should be made during dawn or dusk when insect activity is low. Stand a safe distance away from the nest - product produces a stream that reaches up to 15 feet. Do not stand directly underneath the nest. Aim product at nest by holding container upright with nozzle directed away from face and wind at your back. Press nozzle down and apply product until the nest is thoroughly saturated to ensure the entire population is terminated. Wait until no further activity is observed before removing nest.
STINGING PESTS: Hold product upright with nozzle directed away from face. For best results, spray insect thoroughly until wet. Treated surfaces may be slippery when wet, clean up excess material. This product may stain porous or unsealed surfaces. Prior to use, spray a small inconspicuous area to determine if staining will occur.

PRECAUTIONARY STATEMENTS
With direct contact, may cause moderate eye irritation. Wash thoroughly with soap and water after handling. Avoid contact with eyes, skin, clothing, or plants.
