

Purpose:

PM 80™ uses natural food grade ingredients in a brewing process to create an outstanding pesticide specifically formulated to destroy Powdery Mildew in greenhouse, field or home settings. PM 80™ may be used on growing crops and raw agricultural commodities after harvest.

Freeze Warning: Do not allow product to freeze.**Directions for Indoor Gardeners:**

1. Flush the growing media well with water to allow plant to absorb water.
2. Shake the bottle thoroughly before diluting to desired mixing rate.
3. PM 80™ may be applied when fluorescent/LED lighting is ON - test a small area for HID lighting compatibility

Directions for Outdoor Gardeners:

1. Container growers, flush media with water. Field growers, water plants if possible.
2. Shake the bottle thoroughly before diluting to desired mixing rate.
3. Apply early or late in the day. Avoid spraying mid-day.

Mixing Rates:

1 fl. oz. (30ml) PM 80™ to each quart of water or 4 fl. oz. (120ml) PM 80 to each gallon of water.

Application Directions:

Spray leaves and stems. If the leaf sheds the spray add a wetting agent to help PM 80™ adhere to the leaf and penetrate the Powdery Mildew. SpreadCoat™, a natural plant based no-soap-no detergent wetting agent, is recommended.

For proactive preventative management, spray every 7-14 days to help prevent infestations from incoming Powdery Mildew and Yeast.

For infestation eradication, three (3) application days will be needed. Each application should be two to three (2-3) days apart.

PM 80™ may be used the day before, day of or after harvest. Must mix and apply the same day. See website FAQ.

Spray prior to beneficial insect release.

**Kills and Controls
Powdery Mildew**

*** FUNGICIDE ***

Active Ingredients By Weight

Citric Acid 0.20%

Inert Ingredients

Water, Yeast, Potassium Sorbate 99.80%

Total 100.00%

May be used on growing crops and raw agricultural commodities after harvest.

Storage:

Do not store diluted PM 80™. Store concentrate (in original container) in a cool location, out of direct sunlight. Do not allow product to freeze. Store in a location away from children and pets. Concentrated shelf life is 2 years. If bottle swells, loosen cap to relieve pressure. Then fasten cap securely.

Disposal:

Take to official waste disposal center.

CAUTION:

Keep out of reach of children. The contents of this bottle are highly concentrated. Do not ingest. In case of contact with eyes, rinse with water. If irritation should occur seek medical attention. Use only as directed. Buyer assumes all liability when not used as directed.

PM 80™ is not registered with the US Federal Environmental Protection Agency. Its formula qualifies for exemption under FIFRA section 25 (b) as a minimum risk pesticide.

CONCENTRATED - MAKES 32 GALLONS

Net Contents 1 Quart (32 fl. oz.) 960 ml
