Disinfectant and Cleaner
Surface Friendly
Kills Clostridium difficile spores in 4 minutes
Effective against a broad range of microorganisms

**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

**ACTIVE INGREDIENT:**
Sodium Dichloro-s-triazinetrione

**OTHER INGREDIENTS**

**TOTAL**

*Equivalent to 31.10% active chlorine by tablet weight. Refer to dilution chart for Available Chlorine concentrations.

**Defender is for use in:**

- Hospitals, nursing homes, medical and dental offices and clinics, operating rooms, isolation wards, and medical research facilities.
- Veterinary clinics, animal life science laboratories, kennels, breeding and grooming establishments, pet animal quarters, zoos, pet shops, and other animal care facilities.
- Cosmetic, pharmaceutical, and medical device manufacturing facilities, biotechnology firms, pharmacies, and compounding pharmacies.

**Defender provides effective cleaning strength that will not dull high gloss floor finishes with repeated use.**

**FIRST AID**

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IN THE EVENT OF A MEDICAL EMERGENCY CALL YOUR-poison control center at 1-800-222-1222.** Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. See side panel for additional precautionary statements.
**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

**HEALTHCARE DISINFECTION** This product, DEFENDER, is a Hospital Use Disinfectant. General Healthcare disinfectant (538 ppm available chlorine disinfectant solution) is effective against standard gram positive and gram negative bacteria (Staphylococcus aureus, Pseudomonas aeruginosa and Salmonella enterica) and cold and flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective for blood borne viruses and animal care facilities when used at level of 3576 ppm available chlorine disinfectant solution. It is effective against HIV, Hepatitis B, Feline Calicivirus, Norovirus, Canine Distemper Virus, Infectious Canine Hepatitis, Avian Influenza, Porcine Parvovirus, Running & Stunting Virus (benomylviruses), Actinobacillus pleuropneumoniae, Pasteurella multocida, Brucella melitensis, Shigella flexneri, Staphylococcus aureus, Streptococcus pneumoniae, Streptococcus pyogenes, and Clostridium perfringens USDA with a 10 minute contact time. For Transmissible gastroenteritis (TGE), Vesicular Stomatitis, African swine fever, Hog cholera/Classical swine fever, and Avipox (fowl pox). A 30 minute contact time is required.

**Note:** This California DPR has not yet approved the use of this product Defender against these animal pathogens. Only approved for use against Canine parvovirus, Newcastle Disease Virus, Pseudorabies, Canine Distemper Virus, & Feline Calicivirus in the state of California.

This product is also effective as a Healthcare disinfectant for critical areas potentially contaminated with C. Diff spores when used at a level of 2153 ppm available chlorine disinfectant solution.

**Notice to User:** This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**GENERAL DISINFECTION** This product, DEFENDER, is a general disinfectant at 538 ppm available chlorine disinfectant solution effective against Staphylococcus aureus, Salmonella enterica, Pseudomonas aeruginosa and cold and flu (respiratory syncytial virus, influenza H1N1). Prepare a 538 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow solution to remain wet for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTION FOR SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES**

**PREPARATION OF USE SOLUTION:** Prepare a 1076 ppm solution; refer to Dilution Chart. Keep in a properly labeled container to protect against contamination. Unused solution must be discarded.

**DISINFECTANT/VIRUCAL DIRECTIONS:** Prepare a 1076 ppm solution; refer to dilution chart. Apply use solution to dried, hard, non-porous, inanimate surfaces with brush, spray device, sponge, cloth, or mop to wet all surfaces thoroughly. Allow to remain wet for 10 minutes. Remove any product by wiping with brush, sponge, or cloth. For spray applications use a coarse spray device. Spray 6 inches from surface, and rub with brush, sponge, wipe, or cloth. Do not use spray mist. Before using this product, food products and packaging materials must be removed from the room or carefully protected. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**Kills HIV-1, Hepatitis A, and Hepatitis B viruses on PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in healthcare settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/object with blood or body fluids, and in which the surfaces/object likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS), Hepatitis A virus, and Hepatitis B virus.

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:**

**PERSONAL PROTECTION:** Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings. **CLEANING PROCEDURE:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. This cleaning process may be accomplished with any cleaning solution, including DEFENDER. **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal. **CONTACT TIME:** Leave solution wet for 10 minutes.

**DISINFECTION FOR SURFACES CONTAMINATED WITH CLOSTRIDIUM DIFFICILE IN 4 MINUTES** Special Label Instructions for Cleaning Prior to Disinfection against Gastrointestinal spores. **PERSONAL PROTECTION:** Wear appropriate barrier protection such as gloves, gowns, masks or eye coverings. **CLEANING PROCEDURE:** Fecal matter or eye covering. Clean in a pattern to Disinfect against Tuberculosis: This product when used as directed below is effective against Mycobacterium bovis. This product DEFENDER is a Healthcare disinfectant when used at level of 4,300 ppm available chlorine disinfectant solution. It is effective against Norovirus with a 1 minute contact time. For Salmonella enterica, Staphylococcus aureus, Pseudomonas aeruginosa, Influenza B/H1N1, Acinetobacter baumannii 4 minute contact time is required. Prepare a 4,300 ppm solution; refer to Dilution Chart. Apply to surfaces and objects with any open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**GENERAL DISINFECTION WITHOUT PRECLEAN** This product DEFENDER is a Healthcare disinfectant when used at level of 4,300 ppm available chlorine disinfectant solution. It is effective against Norovirus with a 1 minute contact time. For Salmonella enterica, Staphylococcus aureus, Pseudomonas aeruginosa, Influenza B/H1N1, Acinetobacter baumannii 4 minute contact time is required. Prepare a 4,300 ppm solution; refer to Dilution Chart. Apply to surfaces and objects with any open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTION FOR SURFACES CONTAMINATED WITH TUBERCULOSIS IN 4 MINUTES** Special Label Instructions for Cleaning Prior to Disinfection against Tuberculosis: This product when used as directed below is effective against Mycobacterium bovis. This product can be used on hard nonporous surfaces in commercial institutional hospitals and premises (including kitchens, bathrooms, nurseries, sick rooms, laundry rooms, eating establishments, pet kennels and veterinary premises). To disinfect hard nonporous surfaces first clean surfaces by removing gross filth (loose dirt debris food materials etc). Prepare a 5,382 ppm available chlorine solution. Thoroughly wet surface with the solution and allow it to remain in contact with the surface for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

See insert for full directions for use.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

**PESTICIDE STORAGE**

Store in a cool, dry, well-ventilated area at temperatures below 40°C/104°F. Avoid moisture getting into container.

**PESTICIDE DISPOSAL**

Pesticide may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

**CONTAINER HANDLING**

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes, on skin, or clothing. Avoid breathing dust.
Wear chemical-resistant gloves and safety glasses or face shield when making up solution.
Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

**GENERAL DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

**HEALTHCARE DISINFECTION**

This product, DEFENDER, is a Hospital Use Disinfectant. General Healthcare disinfectant (538 ppm available chlorine disinfectant solution) is effective against standard gram positive and gram negative bacteria (Staphylococcus aureus, Pseudomonas aeruginosa and Salmonella enterica) and cold and flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective as a Healthcare disinfectant for blood borne viruses and animal care facilities when used at a level of 1076 ppm available chlorine disinfectant solution. It is effective against HIV, Hepatitis B, Norovirus, Staphylococcus aureus, Influenza A, Canine hepatitis virus, Bovine parvovirus, New Castle Disease Virus, Pseudorabies, Canine distemper virus, Feline parvovirus, and Hepatitis B virus. It is also effective as a Healthcare disinfectant for critical areas potentially contaminated with C. difficile spores when used at a level of 2153 ppm available chlorine disinfectant solution.

**SPECIAL INSTRUCTIONS FOR CLEANING**

Containers (spray bottles) must be rinsed with potable water before reuse. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product may be used to clean or decontaminate critical or semi-critical medical devices prior to sterilization or cleaning.

**DISINFECTION FOR SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES**

**PREPARATION OF USE SOLUTION:** Prepare a 1076 ppm solution; refer to dilution chart. Keep in a properly labeled container to result in toxic substances must be entirely discarded. Prepared solution including DEFENDER.

**DISSOLUTION OF INFECTIOUS MATERIALS:** Blood and other body fluids must be thoroughly cleaned by removing gross material from the solution and allow to remain wet for 10 minutes. Allow to air dry. Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTION IN PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS**

Cleaning Prior to Disinfection against Clostridium difficile (C. difficile) spores: Prepare a 4,306 ppm solution; refer to dilution chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wiping equipment, or coarse trigger sprayer. Allow surface to remain wet for 10 minutes. Allow to air dry. Prepare a fresh solution daily when using open containers, buckets or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**GENERAL DISINFECTANT AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS**

**PERSONAL PROTECTION:** Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings. **CLEANING PROCEDURE:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. The cleaning process may be accompanied with any cleaning solution including DEFENDER. **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids must be adequately and disposed of in accordance with federal, state and local regulations for infectious waste disposal. **CONTACT TIME:** Leave surface wet for 10 minutes.

**DISINFECTION OF BLOOD/BODY FLUIDS**

**DISSOLUTION OF INFECTIOUS MATERIALS:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. This process may be accompanied with any cleaning solution including DEFENDER. **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids must be adequately and disposed of in accordance with federal, state and local regulations for infectious waste disposal. **CONTACT TIME:** Leave surface wet for 10 minutes.

**DISINFECTION FOR SURFACES CONTAMINATED WITH CLOSTRIDIUM DIFFICILE IN 4 MINUTES**

Special Label Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores: Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks or eye covering. **CLEANING PROCEDURE:** Fecal material must be thoroughly cleaned from surfaces and objects before disinfection by application of the disinfectant product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse solid cloth. **INFECTIOUS MATERIALS DISPOSAL:** Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

**GENERAL DISINFECTANT WITHOUT PRECLEAN**

This product DEFENDER is a Healthcare disinfectant when used at level of 4,306 ppm available chlorine disinfectant solution. It is effective against Norovirus with a 1 minute contact time. For Salmonella enterica, Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella enterica, and Hepatitis A virus, 4,306 ppm solution; refer to dilution chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wiping equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). **CONTACT TIME:** Leave surface wet for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids must be adequately and disposed of in accordance with federal, state and local regulations for infectious waste disposal. **CONTACT TIME:** Leave surface wet for 10 minutes.

**DISINFECTION FOR SURFACES CONTAMINATED WITH TUBERCULOSIS IN 4 MINUTES**

Special Label Instructions for Cleaning Prior to Disinfection against Tuberculosis: This product DEFENDER is a Healthcare disinfectant when used at level of 4,306 ppm available chlorine disinfectant solution. It is effective against M. tuberculosis 1 minute contact time. For Salmonella enterica, Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella enterica, and Hepatitis A virus, 4,306 ppm solution; refer to dilution chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wiping equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). **CONTACT TIME:** Leave surface wet for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids must be adequately and disposed of in accordance with federal, state and local regulations for infectious waste disposal. **CONTACT TIME:** Leave surface wet for 10 minutes.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal. PESTICIDE DISPOSAL

Pesticide must be properly disposed of. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

**CONTAINER HANDLING**

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

HEALTHCARE DISINFECTION This product, DEFENDER, is a Hospital Use Disinfectant. General Healthcare disinfectant (538 ppm available chlorine disinfectant solution) is effective against standard gram positive and gram negative bacteria (Staphylococcus aureus, Pseudomonas aeruginosa and Salmonella enterica) and Cold and Flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective as a Healthcare Disinfectant for blood borne viruses and animal care facilities when used at level of 1076 ppm available chlorine disinfectant solution. It is effective against HIV, Hepatitis B, Feline Calici virus, Norovirus, Canine Distemper virus, Infectious Canine hepatitis, Teschen/Falking disease, Avian influenza, Porcine parovirus, Running & Stunting Virus (torosomaviridae), Astropiculcus pleuroepitheliococcis (protopin), Boreaspira (Procorella/Sequula) hydrosyringense (Pseudomonas), Gumboro disease, Streptococcus uberis, Streptococcus dysgalactiae, and Clostridium perfringens USDA with a 10 minute contact time. For Transmissible gastroenteritis (TGE), Swine Vesicular disease, African swine fever, Hog cholera/Classical swine fever, and Avipox (fowl pox) a 30 minute contact time is required.

Note: The California DPR has not yet approved the use of this product Defender against these animal pathogens. Only approved for use against Canine parovirus, Newcastle Disease Virus, Pseudoreables, Canine Distemper Virus, & Feline Calici virus in the state of California.

This product is also effective as a Healthcare disinfectant for critical areas potentially contaminated with C. Diff spores when used at a level of 2153 ppm available chlorine disinfectant solution.

Infection Control: Use two (2) or more methods of infection control (sterepsis, physical and chemical) to remove and prevent microorganisms. Physical methods include: cleaning, washing, brushing and/or scrubbing, rinsing, and drainage of water. Chemical methods include: the use of disinfectants to control microorganisms. Chemical disinfection should be used in conjunction with physical methods to ensure the removal of waste material (blood debris, food materials etc.) from the surface before disinfection of surfaces that may be contaminated with blood or body liquids. The disinfectant solution should be effective for at least three (3) minutes to be effective against the target organisms.

Thoroughly wet surface with the solution and allow it to remain in contact with the surface for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

GENERAL DISINFECTION This product, DEFENDER, is a general disinfectant at 538 ppm available chlorine disinfectant solution effective against Staphylococcus aureus, Salmonella enterica, Pseudomonas aeruginosa and cold and flu (respiratory syncytial virus, Influenza H1N1). Prepare a 538 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

DISINFECTION FOR SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES

PREPARATION OF USE SOLUTION: Prepare a 1076 ppm solution; refer to Dilution Chart. Keep in a properly labeled container to protect against contamination. Unused solution must be discarded.

INSTRUCTIONS/URICIDAL DIRECTIONS: Prepare a 1076 ppm solution; refer to dilution chart. Apply solution to pre-cleaned, hand-nonaux, inanimate surfaces with brush, spray device, sponge, cloth, or mop to wet all surfaces thoroughly. Allow to remain wet for 10 minutes. Then disinfect by wiping with brush, sponge, cloth. For spray applications use a coarse spray device. Spray 6-8 inches from surface, and rub with brush, sponge, cloth. Do not breathe spray mist. Before using this product, food products and packaging materials must be removed from the room or carefully protected. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

KILLS HIV-1, Hepatitis A, and Hepatitis B viruses on PRE-CLEARED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/object with blood or body fluids, and in which the surfaces/object likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS), Hepatitis A virus, and Hepatitis B virus.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

PERSONAL PROTECTION: Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings. CLEANING PROCEDURE: Blood and other body fluids must be thoroughly cleaned from the surface using appropriate equipment. This cleaning process may be accomplished with any cleaning solution including DEFENDER. DISPOSABLE OF INFECTIOUS MATERIALS: Blood and other body fluids must be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal. CONTACT TIME: Leave surfaces wet for 10 minutes.

DISINFECTION FOR SURFACES CONTAMINATED WITH CLOSTRIDIUM DIFFICILE IN 4 MINUTES Special Label Instructions for Cleaning Prior to Disinfection: Pour the disinfectant in the appropriate container. Use appropriate barrier protection such as gloves, gowns, masks or eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/object before disinfection by application with a clean cloth, wipe, and/or sponge saturated with the disinfectant product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloth. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

PREPARE a 4398 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foamig equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

GENERAL DISINFECTION WITHOUT PRECLEAN This product DEFENDER is a Healthcare disinfectant when used at level of 4396 ppm available chlorine disinfectant solution. It is effective Norovirus with a 1 minute contact time. Prepare a 4396 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

DISINFECTION FOR SURFACES CONTAMINATED WITH TUBERCULOSIS IN 4 MINUTES Special Label Instructions for Cleaning Prior to Disinfection Against Tuberculosis: This product when used as directed below is effective against Mycobacterium bovis. This product may be acute ly hazardous. Wastes resulting from the use of this product must be disposed of on-site, or an approved waste disposal facility.

DISPOSAL Non-refillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.
Disinfectant and Cleaner

Surface Friendly
Kills Clostridium difficile spores in 4 minutes
Effective against a broad range of microorganisms

KEEP OUT OF REACH OF CHILDREN
DANGER

ACTIVE INGREDIENT:
Sodium Dichloro-s-triazinetrione ........................................... 48.21% *
OTHER INGREDIENTS ........................................................................ 51.79%
TOTAL ............................................................................... 100.00%
*Equivalent to 31.10% active chlorine by tablet weight. Refer to dilution chart for Available Chlorine concentrations.

Defender is for use in:
- Hospitals, nursing homes, medical and dental offices and clinics, operating rooms, isolation wards, and medical research facilities.
- Veterinary clinics, animal life science laboratories, kennels, breeding and grooming establishments, pet animal quarters, zoos, pet shops, and other animal care facilities.
- Cosmetic, pharmaceutical, and medical device manufacturing facilities, biotechnology firms, pharmacies, and compounding pharmacies.

Defender provides effective cleaning strength that will not dull high gloss floor finishes with repeated use.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes, on skin, or clothing. Avoid breathing dust. Wear chemical-resistant gloves and safety glasses or face shield when making up solution. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IN THE EVENT OF A MEDICAL EMERGENCY CALL YOUR POISON CONTROL CENTER AT 1-800-222-1222. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. See side panel for additional precautionary statements.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

**HEALTHCARE DISINFECTION**

This product, DEFENDER, is a Hospital Use Disinfectant. General Healthcare disinfectant (538 ppm available chlorine disinfectant solution) is effective against standard gram positive and gram negative bacteria (Staphylococcus aureus, Pseudomonas aeruginosa and Salmonella enterica) and Cold and flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective as a Healthcare disinfectant for blood borne viruses and animal care facilities when used at level of 1076 ppm available chlorine disinfectant solution. It is effective against HIV, Hepatitis B, Feline Calicivirus, Norovirus, Canine Distemper virus, Infectious canine hepatitis, Treponema pallidum, Influenza, Parvovirus, Herpes Simplex virus (HSV-1, HSV-2), and Rabies virus. Staphylococcus aureus, Pseudomonas aeruginosa, and Salmonella enterica are killed by DEFENDER. This product kills bacteria (538 ppm available chlorine disinfectant solution) and is effective against viruses, fungus and certain protozoa. DEFENDER is a general purpose disinfectant when used at a level of 538 ppm available chlorine disinfectant solution.

This product is effective against Staphylococcus aureus, Pseudomonas aeruginosa and cold and flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective against many viruses and bacteria that cause respiratory, gastrointestinal, and skin infections. DEFENDER is effective against a wide range of viruses and bacteria, including those that cause infections such as cold, flu, and gastrointestinal diseases. It is also effective against bacteria that cause skin infections, such as staphylococcus and pseudomonas.

**GENERAL DISINFECTION**

This product, DEFENDER, is a general disinfectant at 538 ppm available chlorine disinfectant solution effective against Staphylococcus aureus, Pseudomonas aeruginosa and cold and flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective against many viruses and bacteria that cause respiratory, gastrointestinal, and skin infections. DEFENDER is effective against a wide range of viruses and bacteria, including those that cause infections such as cold, flu, and gastrointestinal diseases. It is also effective against bacteria that cause skin infections, such as staphylococcus and pseudomonas.

**DISINFECTION FOR SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES**

PREPARATION OF USE SOLUTION: Prepare a 1076 ppm solution; refer to Dilution Chart. Keep in a properly labeled container to protect against contamination. Unused solution must be discarded.

**DISINFECTANT/VIRUCIDAL DIRECTIONS:** Prepare a 1076 ppm solution; refer to dilution chart. Apply use solution to pre-cleaned, hard, non-porous, inanimate surfaces with brush, spray device, sponge, cloth, or mop to wet all surfaces thoroughly. Allow to remain wet for 30 minutes, then remove all dried material, then remove product by wiping with brush, sponge, cloth, or mop to wet all surfaces thoroughly. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger spray. Allow surface to remain wet for 30 minutes. Allow to air dry.

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS**

PERSONAL PROTECTION: Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings.

CLEANING PROCEDURE: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. This cleaning process may be accomplished with any cleaning solution including DEFENDER. DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to federal, state, and local regulations for infectious waste disposal. CONTACT TIME: Leave surfaces wet for 10 minutes.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

**PESTICIDE STORAGE**

Store in cool, dry, well-ventilated area at temperatures below 40°C/104°F. Avoid moisture getting into container.

**PESTICIDE DISPOSAL**

Pesticide may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

**CONTAINER HANDLING**

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.
PERSONAL PROTECTION: Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings. **CLEANING PROCEDURE:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. This cleaning process may be accomplished with any cleaning solution including DEFENDER. **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal. **CONTACT TIME:** Leave surfaces wet for 10 minutes.

**DISINFECTION FOR SURFACES CONTAMINATED WITH CLOSTRIDIUM DIFFICILE IN 4 MINUTES**

Special Label Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores:

**PERSONAL PROTECTION:**

Wear appropriate barrier protection such as gloves, gowns, masks or eye covering.

**CLEANING PROCEDURE:**

Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with a clean cloth, mop, and/or sponge saturated with the disinfectant product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths.

**DISPOSAL OF INFECTIOUS MATERIALS:** Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

Prepare a 4,306 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**GENERAL DISINFECTION WITHOUT PRECLEAN**

This product DEFENDER is a Healthcare disinfectant when used at level of 4,306 ppm available chlorine disinfectant solution. It is effective against Norovirus with a 1 minute contact time. For Salmonella enteritica, Staphylococcus aureus, Pseudomonas aeruginosa, carbapenem resistant Klebsiella pneumoniae, Acinetobacter baumannii 1 minute contact time is required. Prepare a 4,306 ppm solution; refer to Dilution Chart. Apply to surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTION FOR SURFACES CONTAMINATED WITH TUBERCULOSIS IN 4 MINUTES**

Special Label Instructions for Cleaning Prior to Disinfection against Tuberculosis:

This product when used as directed below is effective against Mycobacterium bovis. This product can be used on hard nonporous surfaces in commercial institutional hospital and premises (including kitchens, bathrooms, nurseries, sick rooms, laundry rooms, eating establishments, pet kennels and veterinary premises). To disinfect hard nonporous surfaces first clean surface by removing gross filth (loose dirt debris food materials etc). Prepare a 5,382 ppm available chlorine solution. Thoroughly wet surface with the solution and allow it to remain in contact with the surface for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

See Insert for full directions for use.
