PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Do not use on dogs less than 10 weeks of age. Do not use if the dog is pregnant, lactating, or debilitated. To be used only as directed.

DO NOT USE ON CATS

To use, follow directions and precautions on this product label. Read and follow all directions and precautions on this product label. For additional information, call 1-888-241-9545. For external use only. Causes moderate eye irritation. Avoid contact with eyes or mucous membranes. Do not drink. Keep out of reach of children and animals.

Directions for Use:
1. OPEN: Lift open red door. To apply the treatment, use one disposable liquid tube for each dog/puppy. To open, lift up tab to push aside dog’s/puppy’s hair to allow direct liquid application to the skin. The tube is sealed inside, so you can lift up the tab without taking the tube out of the applicator. If tab refuses to lift, gently work it up and around the applicator device tip to push aside dog’s/puppy’s hair to allow direct liquid application to the skin. Do not get this product in dog’s/puppy’s eyes or mouth.
2. LOAD: To load, place tube inside red applicator device. Insert the tip of the applicator device under the red tab. The tip of the applicator device provides the most precise application.
3. CLOSE: Close the red door and the tube will snap open. The Vet-Kem® Applicator is specially designed to make applying flea and tick control easier and more precise than ever before. The tube is sealed inside, so you can lift up the tab without taking the tube out of the applicator device.
4. APPLY: The dog should be standing for easy application. To apply, use tip to part hair and get into dog/puppy’s skin. Press on tube while using the tip as close to the skin as possible. Reapply monthly. Treatment of dogs/puppies with this product rapidly kills fleas and may cause a temporary skin irritation at the application site. For external use only: Causes moderate eye irritation. Avoid contact with eyes or mucous membranes. Do not drink.

Heat (average actual temperature): 75°F  (24°C)

Instruction for Use:
To apply the treatment, use one disposable liquid tube for each dog/puppy with the applicator device. To apply the treatment, use one disposable liquid tube for each application with the applicator device. To apply the treatment, use one disposable liquid tube for each application with the applicator device. To apply the treatment, use one disposable liquid tube for each application with the applicator device.
