FUNGICIDE/BACTERICIDE
Dry Flowable

Active Ingredients

Copper Hydroxide* (CAS No. 20427-59-2) 46.1%
Total 100.0%

(* Metallic Copper Equivalent 30%)

Nonrefillable Container Net: 4 lbs.

EPA Reg. No. 91411-11-70051
EPA Est. No. 91411-TX-001

Manufactured for:
Certis USA LLC
9145 Guilford Rd, Suite 175
Columbia, MD 21046

Made in USA

AWA170172

Caution

First Aid

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

See back panel for additional precautionary statements.

**Application**

- Apply as pre-bloom and post-bloom sprays.
- Use higher rates when conditions favor disease.
- Use lower rates in certain situations. See table for appropriate rates.

**Mixing**

- Mix the concentrate in water. Use 100 gallons of water per acre.
- Apply 4 gallons of suspension as a drench on the trunk area of each tree.

**Use**

- Use in the lower trunk area of each tree. Apply in early spring or in fall after harvest for severe phytotoxicity.
- Use in the lower trunk area of each tree. Apply in early spring or in fall after harvest for severe phytotoxicity.
- Use in the lower trunk area of each tree. Apply in early spring or in fall after harvest for severe phytotoxicity.

**Recommended Rates**

- Raspberries, strawberries: 0.75 - 1.25 lb.
- Alfalfa: 1.0 - 2.5 lb.
- Alfalfa: 1.0 - 2.5 lb.
- Citrus, peppers, tomatoes: 1.25 - 2.5 lb.

**Spray Intervals**

- Alfalfa: 5 - 7 days
- Lilies: 10 to 14 days
- Tomatoes: 10 to 14 days
- Citrus: 10 to 14 days

**Spray Duration**

- Spray duration is typically 10 to 14 days, but can be adjusted based on weather conditions and disease pressure.

**Special Considerations**

- Use in the lower trunk area of each tree. Apply in early spring or in fall after harvest for severe phytotoxicity.
- Use in the lower trunk area of each tree. Apply in early spring or in fall after harvest for severe phytotoxicity.
- Use in the lower trunk area of each tree. Apply in early spring or in fall after harvest for severe phytotoxicity.

**Precautions**

- Do not use on vegetables, turf, ornamentals, or ornamentals as a seed treatment. Use only as directed.
- Do not mix with or use with any other pesticide or chemical unless specifically directed.

**Environmental Considerations**

- Do not contaminate water sources or surface water.
- Do not apply within 25 feet of water bodies.

**Storage and Handling**

- Store in a cool, dry place.
- Do not use on vegetables, turf, ornamentals, or ornamentals as a seed treatment. Use only as directed.

**Disclaimer**

- This product is not registered for use in California.
DO NOT connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices are used. Nonuniform distribution of treated water.

Chemigation systems connected to public water systems must contain a functional, compatible with pesticides and capable of being fitted with a system interlock. Do not connect irrigation systems (including center pivot, lateral move, traveler, big gun, or plastic pipe solid set system(s)).

Application to a public water system is not allowed. If compatibility is not met, Do not connect irrigation systems to public water systems. Use the higher rates when conditions favor disease.

Insecticides, nutrients, etc. should be added last. If compatibility is not met, DO NOT use the pesticide. Compatibility must be determined before application. Compatibility with the materials used in the construction of application equipment, such as aluminum, plastic, or other materials, must be determined. For compatibility, water supply line upstream from the point of pesticide introduction. As an option to the water supply line, use Tee injection equipment and inject the pesticide into the irrigation system just before the injection point. Do not use Tee injection equipment if the pesticide is incompatible with other irrigation system components.

Chemigation systems must be equipped with a system interlock to prevent accidental dispensing of incompatible chemicals. Compatibility must be determined before application. Compatibility with the materials used in the construction of application equipment, such as aluminum, plastic, or other materials, must be determined. For compatibility, water supply line upstream from the point of pesticide introduction. As an option to the water supply line, use Tee injection equipment and inject the pesticide into the irrigation system just before the injection point. Do not use Tee injection equipment if the pesticide is incompatible with other irrigation system components.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep in a cool, dry place in original container.

PESTICIDE CONTROLS: Federal law prohibits this pesticide from being used or sold for application to any food or animal feed.

ENVIRONMENTAL HAZARDS:
This product is to be used in accordance with the most current environmental regulations.

CONTAINER DISPOSAL: (Paper Bag or Plastic Bag)
- Contact Certis USA LLC for disposal instructions.
- Contact your Regional Office for guidance.
- Contact the Environmental Protection Agency, or the Hazardous Waste representative at the nearest EPA facility.

RETAILER DISPOSAL:
- Keep pesticide containers out of the reach of children.
- Dispose of empty pesticide containers in an environmentally sound manner.
- Do not contaminate water, food, or feed by storage or disposal.

USER SAFETY RECOMMENDATIONS

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Mixers, loaders, applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

USERS SHOULD:
- Wash hands before eating, drinking, chewing gum, using tobacco, or handling food
- Change into clean clothing.
- Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.
