PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals

CAUTION

CAUTION See side panel for additional Precautionary Statements.

Do not contaminate water when disposing of used tags.

DO NOT USE IN-close contact with skin or eyes. Avoid breathing dust or spray. Do not use on pregnant animals. Do not use on horses.

Do not induce vomiting unless told to do so by a Poison Control Center or doctor.

Hamilton Laboratories, Inc. Guarantee any responsibility for local adverse reactions. Long-term exposure to FyberTek may cause damage to skin and eyes; refer to local guidelines.

Bayer (reg’d), the Bayer Cross (reg’d), FyberTek™ and Corathon™ are trademarks of Bayer.

For Domestic Animals

For optimum control of horn flies, face flies, Gulf Coast ticks and spinose ear ticks, attach one tag to each ear (two per animal) per mature animal. For calves, apply one tag per mature animal. For optimum control of horn flies, face flies, Gulf Coast ticks and spinose ear ticks attach one tag per animal.

For the control of horn flies (including pyrethroid- and chlorinated hydrocarbon-resistant horn flies), Gulf Coast ticks, face flies and spinose ear ticks up to 5 months.

FyberTek™ allows for maximum insecticide holding capacity and even dispersion of insecticides.

If in eyes:

Hold eye open and rinse slowly and gently with water for 15–20 minutes.

Call a poison control center or doctor for treatment advice.

If on Skin:

Take off contaminated clothing. Wash skin with soap and water after handling and before eating, drinking, chewing gum, or putting anything else into the mouth. To wash hands and any other exposed skin with abundant soap and water. Avoid contact with eyes, skin, and clothing.

Rinse skin immediately with plenty of water for 15–20 minutes.

Call a poison control center or doctor for treatment advice.

If ingested:

Do not induce vomiting unless told to do so by a Poison Control Center or doctor.

For questions or comments, call toll-free 1-800-633-3796.

Insecticide cattle ear tag with FyberTek™

Corathon™

Insecticide Cattle Ear Tag for use on Beef and Non-Lactating Dairy Cattle to control Fleece Flies, Horn Flies, Gulf Coast Ticks and Spinose Ear Ticks

For use with Allflex® Universal Total Tagger with red pin and black clip.

Active Ingredients:
Contains 50% organophosphate insecticides.

Face flies and spinose ear ticks up to 5 months.

Precautionary Statements:

STORAGE AND DISPOSAL

Do not contaminate water when disposing of used tags.

This pesticide is highly toxic to birds, fish and wildlife. Do not apply directly to water.

If on Skin

FIRST AID

S:22”

Contact lenses, if present, after the first 5 minutes, and then continue rinsing eye.

Call a poison control center or doctor for treatment advice.

If on Clothing

Remove tags at end of fly season or prior to slaughter.

Corathon™ has been proven to be effective against horn flies and face flies for up to 5 months.

For optimum control of horn flies, face flies, Gulf Coast ticks and spinose ear ticks, attach one tag to each ear (two tags per animal) per mature animal.

For the control of horn flies (including pyrethroid- and chlorinated hydrocarbon-resistant horn flies), face flies, Gulf Coast ticks and spinose ear ticks on beef and non-lactating dairy cattle.

Leave the label on the squeeze mechanism for easy identification.

Precautionary Statements:

Handling FyberTek™ contains coumaphos and diazinon.

Insecticide used and/or the method of horn fly control on a seasonal basis. Corathon™ contains the organophosphate insecticides coumaphos and diazinon.

Horn flies (including pyrethroid- and chlorinated hydrocarbon-resistant horn flies), Gulf Coast ticks, face flies and spinose ear ticks up to 5 months.

Corathon™ Controls horn flies (including pyrethroid- and chlorinated hydrocarbon-resistant horn flies), face flies, Gulf Coast ticks and spinose ear ticks on beef and non-lactating dairy cattle.

For the control of horn flies (including pyrethroid- and chlorinated hydrocarbon-resistant horn flies), face flies, Gulf Coast ticks and spinose ear ticks on beef and non-lactating dairy cattle.

How To Apply:

Beef and Non-Lactating Dairy Cattle.

WHERE TO APPLY

Chemical-resistant gloves made of rubber or any waterproof material (thickness equal to or greater than 0.575 mm).

Long-sleeved shirt and long pants

Applicators and other handlers must wear:

Re-apply after 5 months.

Using the tube of the applicator, place one tag onto each ear of the animal. Tag may be applied by hand or with the Universal Total Tagger. Place the tag in the center portion of the ear, applying even pressure to the tube to brake the tag. Insert the pin through the thin portion of the tag until it projects 3/8" from the body. Take off the black clip as the tag is inserted. Do not apply more than one tag per ear to any individual animal. Do not exceed the total dose for any individual application on the label. Use only for cattle. Corathon™ contains the organophosphate insecticides coumaphos and diazinon.

Insecticide cattle ear tag with FyberTek™

For use with Allflex® Universal Total Tagger with red pin and black clip.

Designated for use with Allflex® Universal Total Tagger with red pin and black clip.
