SANITIZATION OF HARD, NON-POROUS (INANIMATE) (ENVIRONMENTAL)

1) Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, a pre-soak.
2) Add 0.42 lb. of Sterilex Ultra Powder per gallon of water (50 grams per liter) (or equivalent use dilution).
3) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.
4) Rinse all surfaces thoroughly with a potable water rinse.
5) Rinse all surfaces thoroughly with a potable water rinse.
6) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.

SAFETY PROFILE:
Sterilex Ultra Powder is a hospital-use disinfectant at 0.42 lb per gallon (50 grams per liter), bactericidal according to SANS 7603 and formulated for use on inanimate surfaces such as flooring, walls, ceilings, sinks, and other hard non-porous surfaces.

STORAGE AND DISPOSAL
- Store in a cool, dry place.
- Do not store in areas where there is excessive moisture or where it will come into contact with food or food contact surfaces.
- Keep out of the reach of children.
- Disposal: Do not dispose of in the environment. Follow local guidelines for disposal.

FIRST AID
If inhaled, move to fresher air. If breathing is difficult, give oxygen. Do not induce vomiting.

DIRECTIONS FOR USE
- Use at a rate of 3.7 oz. (105 grams) per 100 square feet of floor surface having 1.3 fl. oz. – 5.1 fl. oz. [38 ml – 150 ml] active ingredient (0.42 lb per gallon or 50 grams per liter).
- Sterilex Ultra Powder is a one-step disinfectant – cleaner. It is effective against bacteria, viruses, fungi, and mold when used as directed.

APPLICATION INSTRUCTIONS FOR TRANSFER LINES:
- Sterilex Ultra Powder is effective against bacteria, viruses, fungi, and mold when used as directed.
- It is a one-step disinfectant – cleaner.
- Use Sterilex Ultra Powder at a rate of 3.7 oz. (105 grams) per 100 square feet of floor surface having 1.3 fl. oz. – 5.1 fl. oz. [38 ml – 150 ml] active ingredient (0.42 lb per gallon or 50 grams per liter).

PRECAUTIONARY STATEMENTS
- Keep out of the reach of children.
- Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 5 minutes. Rinse or sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.

APPENDIX B - DIRECTIONS FOR USE OF ONE STEP DISINFECTANT CLEANER
One-Step Disinfectant Cleaners, like Sterilex Ultra Powder, are designed to disinfect and clean surfaces in a single step. They are effective against bacteria, viruses, fungi, and mold when used as directed. The directions for use typically vary depending on the specific product and its intended use. For Sterilex Ultra Powder, the directions for use generally recommend the following:

1. Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, a pre-soak.
2. Add 0.42 lb. of Sterilex Ultra Powder per gallon of water (50 grams per liter) (or equivalent use dilution).
3. Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.
4. Rinse all surfaces thoroughly with a potable water rinse.
5. Rinse all surfaces thoroughly with a potable water rinse.
6. Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.

SAFETY PROFILE:

APPENDIX B - DIRECTIONS FOR USE OF ONE STEP DISINFECTANT CLEANER
One-Step Disinfectant Cleaners, like Sterilex Ultra Powder, are designed to disinfect and clean surfaces in a single step. They are effective against bacteria, viruses, fungi, and mold when used as directed. The directions for use typically vary depending on the specific product and its intended use. For Sterilex Ultra Powder, the directions for use generally recommend the following:

1. Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, a pre-soak.
2. Add 0.42 lb. of Sterilex Ultra Powder per gallon of water (50 grams per liter) (or equivalent use dilution).
3. Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.
4. Rinse all surfaces thoroughly with a potable water rinse.
5. Rinse all surfaces thoroughly with a potable water rinse.
6. Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping.
APPLICATION INSTRUCTIONS FOR TRANSFER LINES:

1) Add 0.42 lb. of Sterilex Ultra Powder to 1 gallon of water or 1 liter of tap water. Make up the sanitizing solution by adding 0.93 ounces Sterilex Ultra Powder per gallon of water [7 grams/liter] (or equivalent use dilution). Gloves must remain wet for 5 minutes. Change the solution after five (5) minutes have passed.

2) Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities or equipment.

3) Rinse all surfaces thoroughly with a potable water rinse.

4) Sterilize equipment, hatcher, setters, trays, racks, carts, and feed equipment with the use solution prior to wearing, using a coarse spray device, immersion so as to thoroughly wet surface to be sanitized. For sprayer applications, spray 6-8 inches from surface.

5) Let surface air dry thoroughly before wearing gloves. NO POTABLE WATER RINSE IS ALLOWED.

6) Prepare a coarse pump or trigger sprayer for Sterilex Ultra Powder use. USE ONLY Sterilex Ultra Powder for Sterilex Ultra Powder application.

7) Put on gloves and prepare Sterilex Ultra Powder for application. Do not let sanitizing solution come into contact with exposed skin.

8) To prevent cross contamination into animal areas and the packaging and storage areas of food plants, dip the entire doorway path must be covered with the spray, foam or footbath. Ensure a continuous wet blanket of sanitizing solution keeps the space free of dirt and dust especially in areas such as thresholds, gaps, corners.

9) After cleaning and sanitizing equipment, spread Sterilex Ultra Powder evenly to the floor and drain surface, at a ratio of 5 oz. per square foot (150 g/m²) for catwalks; 10 oz. per square foot (300 g/m²) for feed mangers; 20 oz. per square foot (600 g/m²) for feed carts.

10) Thoroughly scrub all treated feed racks, mangers, troughs, automatic feeders, fountains, and waterers with a brush, cloth, mop, sponge, or auto scrubber, sprayer, coarse pump, or immersion so as to thoroughly wet surface to be sanitized. For sprayer applications, spray 6-8 inches from surface. Allow to air dry. Use product within 24 hours after powder has been dissolved in water.
1) Remove all animals and feed from premises, vehicles, and enclosures.

2) Introduce use solution into transfer lines and tanks for watering systems and nipple drinkers.

3) Soak or circulate use solution for at least 10 minutes.

4) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, immersing, using a clean in place (CIP) system, pumping it through the system, or drawing it through the system or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, coolers, ice chests, non residential refrigerator bins for meat, fruit, vegetable and egg; food storage areas and food service areas.

5) Decontaminate floors, ceilings, and walls with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, immersing, using a clean in place (CIP) system, pumping it through the system, or mopping.

6) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, immersing, using a clean in place (CIP) system, pumping it through the system, or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, coolers, ice chests, non residential refrigerator bins for meat, fruit, vegetable and egg; food storage areas and food service areas.

APPLICATION INSTRUCTIONS FOR TRANSFER LINES:

1) Remove all animals and feed from premises, vehicles, and enclosures.

2) Introduce use solution into transfer lines and tanks for watering systems and nipple drinkers.

3) Soak or circulate use solution for at least 10 minutes.

4) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, immersing, using a clean in place (CIP) system, pumping it through the system, or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, coolers, ice chests, non residential refrigerator bins for meat, fruit, vegetable and egg; food storage areas and food service areas.

5) Decontaminate floors, ceilings, and walls with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, immersing, using a clean in place (CIP) system, pumping it through the system, or mopping.

6) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, immersing, using a clean in place (CIP) system, pumping it through the system, or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, coolers, ice chests, non residential refrigerator bins for meat, fruit, vegetable and egg; food storage areas and food service areas.

SAFETY: Remove protective clothing and equipment. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Make sure all surfaces including the floor, walls, and ceiling are wet. Ensure a continuous wet blanket of use-solution is delivered to the floor or bath. Use within 24 hours after powder has been dissolved in water. The use-solution contains no toxic or hazardous ingredients. It creates no dangerous fumes. It is not a skin irritant and will not penetrate the skin. It is suitable for food preparation and storage areas of food plants. Use within 24 hours after powder has been dissolved in water. The use-solution contains no toxic or hazardous ingredients. It creates no dangerous fumes. It is not a skin irritant and will not penetrate the skin. It is suitable for food preparation and storage areas of food plants. Use within 24 hours after powder has been dissolved in water.

Sterilex Ultra Powder was evaluated using the Non-Food Contact Surface Sanitizer Test and was determined to be effective against:

- Staphylococcus aureus (ATCC 29213)
- Enterococcus faecalis (ATCC 29212)
- Salmonella Enteritidis (ATCC 13076)
- Salmonella Typhimurium (ATCC 12014)
- Pseudomonas aeruginosa (ATCC 15442)
- Bacillus subtilis (ATCC 6633)
- B. subtilis spores (ATCC 6633 sporulated in 24 hours)
- Enterobacter cloacae (ATCC 13048)

Sterilex Ultra Powder does not become active until it comes in contact with moisture on the floor.

PRECAUTIONARY STATEMENTS

DANGER

- This product is flammable in the presence of an open flame or other ignition source. Keep away from any open flame or ignition source.
- Keep out of the reach of children.

DANGER

- Keep out of the reach of children.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration.

IF ENTERED INTO THE EYE: Rinse eye thoroughly with water for at least 15 minutes. Seek medical attention immediately.

IF SWALLOWED: Do not induce vomiting. Rinse mouth with water. Call a physician immediately.

IF SKIN CONTACT: Wash skin thoroughly with soap and water. If irritation continues, seek medical attention.

IF INGESTED: Do not induce vomiting. If person is not breathing, call 911 or an ambulance, then give artificial respiration.

PREPARATION OF NON-FOOD CONTACT SANITIZER USE SOLUTION:

Mix 0.93 ounces Sterilex Ultra Powder per gallon of water (7 grams/liter) (or equivalent use dilution). Gently mix for 24 hours after powder has been dissolved in water.

Sterilex Ultra Powder does not become active until it comes in contact with moisture on the floor.
4) Drain transfer lines and tanks.

Use product within 24 hours after powder has been dissolved in water.

---

3) Allow surfaces to remain wet for at least 10 minutes.

---

2) Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities.

---

1) Remove all animals and feed from premises, vehicles, and enclosures.

---

5) Rinse all surfaces thoroughly with a potable water rinse.

---

Keep out of children's reach. Store at room temperature out of direct sunlight, DO NOT freeze. Follow local, state and federal regulations.

---

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration.

IF IN EYES: Rinse eyes immediately with running water for 15 minutes. Remove any contact lenses if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

---

Sterilex Ultra Powder was evaluated using the Non-Food Contact Surface Sanitizer Test and was proven to be effective against the following organisms:

- Escherichia coli (ATCC 11229)
- Listeria monocytogenes (ATCC 49594)
- Pseudomonas aeruginosa (Pseudomonas)(ATCC# 15442), Staphylococcus aureus (Staph)(ATCC# 6538),
- Staphylococcus epidermidis (Staph)(ATCC# 12228)
- Staphylococcus aureus (Staph)(ATCC# 12600)
- Enterococcus faecalis (ATCC 29212), Enterococcus faecium (ATCC 29216)
- Bacillus cereus (ATCC 10876), Bacillus licheniformis (ATCC 14579)
- Salmonella enterica (ATCC 14028), Salmonella typhimurium (ATCC 34738),
- Shigella flexneri (ATCC 12022), Shigella sonnei (ATCC 10463),
- B. megaterium (ATCC 13032), Brevundimonas diminuta (ATCC 17703),
- C. freundii (ATCC 25922), Enterobacter cloacae (ATCC 13047),
- E. coli (ATCC 25922), E. coli (ATCC 8732),
- P. aeruginosa (ATCC 27853), P. aeruginosa (ATCC 15442),

APPLICATION INSTRUCTIONS FOR TRANSFER LINES:

1) Add 0.42 lb. of Sterilex Ultra Powder per gallon of water.

2) Introduce use solution into transfer lines and tanks for watering systems and nipple drinkers.

3) Empty all troughs, racks, and other feeding and watering appliances.

4) Let surface air dry thoroughly before wearing gloves. NO POTABLE WATER RINSE IS ALLOWED. Prepare a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, holding tanks, brewery pasteurizers, wine fermentation tanks, beverage dispensing equipment, beverage transfer techniques, water reservoir tanks, water reservoir pipes, tanks, and piping systems used in food processing; farms, swine farms, poultry and turkey farms, farm premises, hatcheries, refrigerated trucks, kennels, pet animal quarters, zoos, pet shops, animal laboratories, veterinary facilities, animal care facilities, transportation terminals, for heavily soiled areas, a preliminary cleaning is required.

5) Rinse all surfaces thoroughly with a potable water rinse.

Sterilex Ultra Powder is a hospital-use disinfectant at 0.42 lb per gallon (50 grams per liter), Bactericidal according to EPA Reg. No. 63761-5, EPA Est. No. 67441-IL-001.

Treated surfaces must remain wet for 5 minutes, then wipe with sponge, mop or cloth or allow to air dry. Use within 24 hours after powder has been dissolved in water. Use product within 24 hours after powder has been dissolved in water. Use product within 24 hours after powder has been dissolved in water. Use product within 24 hours after powder has been dissolved in water. Use product within 24 hours after powder has been dissolved in water.

Let surface air dry thoroughly before wearing gloves. **NO POTABLE WATER RINSE IS ALLOWED.** Prepare a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping. Clean all areas of vehicles, including mats, crates, cabs and wheels.

**PRECAUTIONARY STATEMENTS**

**Hazard Statement:** Harmful to humans and domestic environments. **Signal Word:** DANGER **Containers:** Inner plastic container, outer cardboard carton. **First Aid Measures:** **Peroxide:** Keep out of the reach of children. **Dilution:** For contact with humans or domestic environment. **Age/Group:** All age/sex groups. **Inhalation:** IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration. **Ingestion:** IF SWALLOWED: Give 1 to 2 glasses of water. **Skin:** IF IN CONTACT WITH SKIN: Wash thoroughly with soap and water. **Eye Contact:** IF IN CONTACT WITH EYES: Hold open eye and flush with water for 15 minutes. **Disposal:** Disposal: Offer for recycling, if available or puncture and dispose of in a sanitary landfill, or by treatment in accordance with applicable laws. **Reactivity:** Reacts with strong acids to give hydrogen peroxide, which is unstable. **Stability:** Stable. **Incompatibilities:** Strong oxidizing agents.

**FIRST AID AND PRECAUTIONARY STATEMENTS**

**Stability:** Stable. **Incompatibilities:** Strong oxidizing agents.

**FIRST AID AND PRECAUTIONARY STATEMENTS**

**Stability:** Stable. **Incompatibilities:** Strong oxidizing agents.

**STORAGE AND DISPOSAL:** Store about 30°C for 10 days in a cool, dry, well-ventilated area, away from food and feed. Store about 30°C for 10 days in a cool, dry, well-ventilated area, away from food and feed. Store about 30°C for 10 days in a cool, dry, well-ventilated area, away from food and feed.

**STORAGE AND DISPOSAL:** Store about 30°C for 10 days in a cool, dry, well-ventilated area, away from food and feed.

**STORAGE AND DISPOSAL:** Store about 30°C for 10 days in a cool, dry, well-ventilated area, away from food and feed.
5) Rinse all surfaces thoroughly with a potable water rinse.

APPLICATION INSTRUCTIONS FOR TRANSFER LINES:
7) Allow surfaces to remain wet for at least 10 minutes.

Sterilex Ultra Powder has been evaluated at a concentration that supports a dilution of 0.93 ounces /gallon [7 grams/liter] (or equivalent use dilution). Scrape waterproof shoes and boots. Walk through foamed. Boots must be allowed to dry before being worn again.

PRECAUTIONARY STATEMENTS
DANGERS: None. Exposure may cause irritation and allergic reaction. Skin sensitization or absorption through skin. Skin protection required for hand contact. Wash hands before eating, drinking, or using the restroom. Wash hands before handling food, equipment, or food articles.

EXPOSURE ROUTES: Inhalation, ingestion, and dermal contact.

FIRST AID:
IF IN EYES: Rinse eyes immediately with plenty of water. Remove contact lenses if present and easy to do. Continue to rinse eyes. Call a poison control center or doctor if irritation persists, pain or redness occurs.

IF INHALED: Remove person to fresh air at once. If not breathing, give artificial respiration immediately. Call emergency medical services. Do not give mouth-to-mouth if victim is unconscious.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water

Note: This is a sodium hypochlorite solution. Avoid contact with eyes or mucous membranes. If contact occurs, rinse with water for at least 15 minutes. Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 5 minutes. Rinse or allow to air dry. Use product within 24 hours after powder has been dissolved in water.

DIRECTIONS FOR USE:
1) Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, a precleaning solution. Equipment) (PPE) with a brush, cloth, mop, sponge, auto scrubber, mechanical spray device, foam or by hand. Equipment should be precleaned according to manufacturer’s specifications and/or industry standards. See Sterilex Ultra Powder kit for more information.

2) Clean surfaces with precleaning solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, floors, walls, countertops, stovetops, sinks, appliances, refrigerators, plastic and other nonporous cutting boards, drinking water coolers, ice making machines, transfer line tubing, water lines, watering systems, farm animal nipple drinkers, fountains and waterers, forks, shovels, scrapers, barns, pens, stalls, facilities and fixtures occupied or traversed by house related equipment; farrowing barns and related areas (nursery blocks, creep areas), chutes, feed racks, mangers, troughs, equipment, farrowing barns and related areas (nursery blocks, creep areas), chutes, feed racks, mangers, troughs, facilities, locker rooms, dressing rooms, shower and bath areas, and exercise equipment.

3) Soak or circulate use solution for at least 10 minutes. Do not use high-pressure sprays or sprayers. Do not use in or on food processing areas, for food contact surfaces, at any point in an operation or processing area. Do not use in or on any area where food is to be prepared, served, or held for service.

4) Rinse all surfaces thoroughly with a potable water rinse. Use within 24 hours after powder has been dissolved in water.

5) Saturate all surfaces with a solution prepared by adding 0.42 lb. of Sterilex Ultra Powder in 1 gal. of tap water [15 g of Sterilex Ultra Powder in 1 gal. of tap water] to the use-solution. Do not use high-pressure sprays or sprayers. Do not use in or on food processing areas, for food contact surfaces, at any point in an operation or processing area. Do not use in or on any area where food is to be prepared, served, or held for service.

6) Triple rinse as follows: Fill the container ¼ full with water and recap. Shake for 10 seconds. Drain for 10 seconds. Repeat until empty. Rinse rinsate may be used on nonfood contact surfaces. Do not use high-pressure sprays or sprayers. Do not use in or on food processing areas, for food contact surfaces, at any point in an operation or processing area. Do not use in or on any area where food is to be prepared, served, or held for service.

7) Allow to air dry. Do not use high-pressure sprays or sprayers. Do not use in or on food processing areas, for food contact surfaces, at any point in an operation or processing area. Do not use in or on any area where food is to be prepared, served, or held for service.

8) Ventilate buildings, cars, boats, and other closed spaces. Do not house livestock or employ equipment until appropriate plastic container and stir.

9) Ventilate buildings, cars, boats, and other closed spaces. Do not house livestock or employ equipment until

10) Keep out of the reach of children.

11) Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 5 minutes. Rinse or allow to air dry. Use product within 24 hours after powder has been dissolved in water.
